TURF, FARM AND HOME.

VOL. XVI.

AUBURN, MAINE, FRIDAY, APRIL 27 1894.

NUMBER 43.

ALIX, 2.07 3-4.

ALIX 2.07 3-4.

THE subject of the sketch which we herewith present to the readers of the TURF is one well known by reason of her brilliant turf career. Alix has been a consistent performer, trotting in 2.30 as a two year old, and has been cutting down the mark until it now stands at 2.07 $\frac{3}{4}$, as above recorded.

In these days of extreme speed, when the 2.10 list is growing so rapidly, we do not stop to consider how fast 2.07 $\frac{3}{4}$ really is. A Nancy Hanks 2.04, or a Directum 2.05 $\frac{1}{4}$ alone claim our attention, and it is the mark of the champions that all are looking at.

Until Oct. 20, 1891, the 2.08 $\frac{3}{4}$ of Maud S., had remained unbeaten for more than six years. Now let us look. Since that time Palo Alto has trotted in 2.08 $\frac{3}{4}$, Kremlin 2.07 $\frac{3}{4}$, Alix 2.07 $\frac{3}{4}$, Arion 2.07 $\frac{3}{4}$, Stamboul 2.07 $\frac{1}{2}$, though the same was

not allowed by the associations, Directum as a four year old trotting in 2.05 $\frac{1}{4}$, and Nancy Hanks 2.04 still the trotting queen. The inception of the breeding stud which led to the advent of Alix dates back something like 33 years.

In 1861 the firm known as Hayes Bros., of Muscatine, Iowa, began the breeding of fine horses. A number of road mares were selected and possessed of as much speed as was possible to get. There was much discussion in regard to the selection of a stallion. Harold, a son of Hambletonian, had gone to preside over the seraglio at Woodburn, Messenger Duroc was the premier stallion at Stony Ford, and the Messrs. Hayes selected Tramp, a son of Gage's Logan, out of a mare by Abdallah. Time proved the wisdom of these selections and the blood introduced at this establishment was in these lines. There were no colts developed at the farm, but stout hearted racers were bred here which made their mark upon the trotting turf.

As time moved along the farm and stock passed from the ownership of the three brothers to that of Daniel Hayes, who, by reason of ill health, was in 1889

compelled to dispose of the stock, and they were consigned to a combination sale at Chicago. Before the horses were catalogued John and Edward Hayes selected a dozen of the very best animals, choosing such as were producers of performers or performers themselves. Of the stock sold at auction Edward Hayes bought ten head and Morris J. Jones eight head. They then formed a partnership and purchased from John Hayes his interest in the picked animals from the Muscatine farm, and thus was formed the nucleus of the Standard Trotting Horse Company's Stud.

The greatness of Alix and Pactolus is evidenced to have been no mistake, but the result of the policy of the original owner of the stock, and this policy is being carried forward to the present time. Mr. Jones subsequently bought the interest of Edward Hayes, becoming sole owner. Mr. Jones has achieved an enviable reputation in the selection of young trotters. As an example of this success he selected Alix and Pontoon as yearlings, with Pactolus a weanling. Alix has a mark of 2.07 $\frac{3}{4}$, Pactolus 2.12 $\frac{3}{4}$, and Pontoon 2.30. Alix trotted as a

three year old, cutting her mark of 2.30 down 13 $\frac{1}{2}$ seconds. As a four year old she won against Constantine, Belle Archer, Grattan and Florida at Lexington, Kentucky, in a \$5,000 stake 2.12 $\frac{1}{2}$, 2.12 $\frac{1}{2}$, 2.13, and the same season crowned herself the queen of four year old trotters by trotting in 2.10 at Nashville, beating Sunol's 2.10 $\frac{1}{2}$.

The history of Alix during her campaign of 1893 is well known. Her stepping a fifth heat in 2.09 $\frac{3}{4}$ made her a strong candidate for the Columbian Exposition stake, and this she won after one of the bitterest battles known in the history of the trotting, and the echoes have not died away entirely yet. She was defeated by Directum later in the season in slow time. Individually Alix is fine in finish and blood-like in form and general appearance. Her sire, Patronage, is a full brother to Patron 2.14 $\frac{1}{4}$, once the champion three year old; with a record of 2.19 $\frac{1}{2}$, being by Pancoast 2.21 $\frac{3}{4}$, son of Woodford Mambrino 2.21 $\frac{1}{2}$, dam Atlanta, by Attorney, by Harold; granddam Flirt, by Gen. Hatch. The dam of Patronage is Beatrice, by Cuyler, granddam Mary Mambrino, dam of Elvira

Joy Inexpressible

Another Boy's Life Saved

Health Blighted by Scrofula and Hip Disease

Perfect Cure, Happiness and Health Given by Hood's Sarsaparilla.

Exeter, N. H.

"C. I. Hood & Co., Lowell, Mass.:

"I cannot praise Hood's Sarsaparilla enough for what it has done for my boy. Some four years ago, when six years old, George was attacked by hip disease in his right leg. We had to get him a pair of crutches, with which he was able to move about, but became badly deformed. We had to have his right leg lanced just above the knee. In a few weeks a second sore broke out, both discharging freely. Agonizing pains afflicted him, he could not bear to be moved, his growth was stopped and

He Was a Mere Skeleton.

He had no appetite, and it was hard work to make him eat enough to keep him alive. A few weeks later we had his hip lanced, and following this five other eruptions broke out, making eight running sores in all. We did all we could for him, but he grew weaker every day, although we had three of the best physicians. As a last resort we were prevailed upon by relatives who had taken Hood's Sarsaparilla with beneficial results to give the medicine a trial. We got one bottle about the first of March, 1892, and he had taken the medicine only a few days when his appetite began to improve. When he had taken one bottle he could move about a little with his crutches, which he had not been able to use for the preceding three months. We continued faithfully with Hood's Sarsaparilla, and in 6 months he was

Able to Be Dressed

and go about the house without the crutches. He has now taken Hood's Sarsaparilla regularly for eighteen months, and for the past six months has been without the crutches, which he has outgrown by several inches. The sores have all healed with the exception of one which is rapidly closing, only the scars and an occasional lump remaining as reminders of his suffering.

Hood's Sarsaparilla Cures

Hood's Sarsaparilla in his case has truly done wonders, and he is daily gaining in flesh and good color. He runs about and plays as lively as any child. We feel an inexpressible joy at having our boy restored to health, and we always speak in the highest terms of Hood's Sarsaparilla." Mrs. HENRY W. MURPHY, Exeter, New Hampshire.

Hood's Pills are prompt and efficient, yet easy in action. Sold by all druggists. 25c.

Reliable Incubator and Brooder Co. Quincy, Ill.

2.18½, by Mambrino Patchen. Pan-coast's dam is Bicara, by Harold.

For game race horse campaigners it would be hard to find a better bred mare than Alix. Her blood lines are all of approved strains. Her home is now at Red Oak, Iowa, and although Mr. Jones is non committal in regard to the future of his great mare it is extremely likely that she will be given a chance to reduce her record in 1894.

OUR VETERINARY COLUMN.

FARMINGTON, April 9, 1894.

1st. Do bots propagate in a horse's stomach, or are they all taken in by the mouth?

2d. If taken in by the mouth how long do they remain in the stomach before they are expelled?

3rd. Do horses have bots that are kept stabled?

4th. Do bots ever cause a healthy horse sickness?

I. S. JACOBS.

1st. The eggs of the bot fly are taken in by the mouth.

2d. They remain in the stomach about eight months.

3rd. Stabulated horses are not so much exposed to the bot fly, yet they undoubtedly have bots.

4th. Bots very seldom cause any trouble in the horse.

WOLCOTT, N. Y., April 14.

MR. EDITOR:—I have a bay horse that shows good speed and has a "quarter crack" and I would like to know your best cure for it. Answer in your next paper and oblige,

JOHN W. OLMSTEAD.

The horse's "quarter crack" should be cut out or made wide at the bottom, next to the soft tissues, and scraped out until there is some irritation in its entire length, especially at the coronary band. It should then be riveted with small horse nails and filled with gutta percha. The horse should then be shod with a bar shoe, the bearing being relieved at the diseased quarter. We think it will require the services of an experienced veterinarian to make this operation, but when well done is usually very successful.

I have a five year old mare that when driving on the road will breathe very loud and coughs some. She has a swelling under the ears and is very rank on the bits. What is the cause and what treatment would you suggest under these circumstances?

C. J. V.

This appears to be thickening of the parotid glands. We think two or three sharp blisters would be indicated, followed by a run to grass for a while. If this treatment is not successful then the case would demand an operation. While under the blister it would be well to give internally the following: Fluid Ext. Bell, two ounces; Potassii Chloratis, one ounce; Liquor Potassii Arsenitis, quantity up to one pint. Give two tablespoonfuls three times a day.

Beware of Ointments for Catarrh that Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c. per bottle.

George Leavitt will have his horse, Parker Gun, by Jay Bird, at the Bates Farm this season.

OLD JACK.

All men like a horse, but only a cavalryman takes a horse into full partnership or gives him that admiration which a horse deserves. Our love for Old Jack began at Gettysburg; when we saw John Captan who rode him, cut off from the command and called upon to surrender. He shouted his defiance, gave Old Jack the spur, and that horse brought him over seven fences and walls and a great ditch, back to his company. A bullet had raked the gallant steed, and the men cheered him as they wiped the blood away with their handkerchiefs.

Late that autumn after a slashing cavalry fight on a Virginia meadow, one afternoon, we found Old Jack standing over the dead body of his master. Other horses were galloping wildly about, but he showed no excitement; wounded horses approached him to beg for sympathy, but he drove them away for fear they would injure the man at his feet. Old Jack was with us up and down the Shenandoah Valley, and one night when a terrific storm stampeded three hundred of our horses over to the enemy, he alone returned. He raided and fought throughout the memorable year of 1864, and was wounded twice again. He was ready for the last campaign, and when the surrender came the white flag almost brushed his nose; only the day before that a piece of shell had given him a severe wound, but when driven to the rear with hundreds of others, he literally fought his way back. A quartermaster at Washington got hold of him when he returned from Appomattox, but when we knew that our brigade was to go out west we got Old Jack on the active list again, and he was one of us at Leavenworth when they weeded out the horses preparatory to the jaunt to the Colorado lines. They led Old Jack away to brand him with a C, and sell him to the highest bidder, at auction. Co. A resolved, and petitioned, and argued, and our second Lieutenant bought him before the degrading branding-iron had touched his shoulder. We gave him a reception when he returned after his brief absence, the sort of welcome an old comrade would have counted on to get. Up the Platte, as we entered the Indian country a dozen men were cut off from the command one day. It was a race for life. The horse of a trooper, fell with a broken leg, and the Lieutenant took the man up behind. Old Jack came in bearing double, and an Indian arrow had grazed his quarter, while making the last half-mile. Further west it was Old Jack who suddenly raised an alarm, one midwinter-night just in time to save us from an attack. A week later he was bitten by a rattlesnake, the order was to shoot the old veteran as it had been in a score of other horses, but we would not have it so. Providence sent a rain storm to stop the march and we poured whiskey enough down Old Jack's throat to make ten men drunk; after three or four days he was kicking up his heels as of yore, and every man in the brigade wanted to look at him. One day between the forks of the upper Platte, Old Jack's rider ventured too far from camp, and was rushed by a dozen Indians. He dismounted, and menaced them over the saddle with his revolver; the horse stood like a rock; they yelled, and shrieked, and waved blankets, and fired their rifles, but could not stampede him. In the midst of the excitement Old Jack saw the relief party while yet a mile away, and neighed a shrill recognition and a warning to ride fast. When I tell you all these things you will not wonder at our kindly feelings towards our old comrade.

There were just fifty men of us in Co. A, out on the plains. Had we some days been obliged to accept fifty hardtacks for a full days rations; no man would have begrudged Old Jack a generous nibble. I remember when the sad day came, as if it were last week; two hundred of us were pushing a fresh Indian trail, and the

hour was noon; when Old Jack going at a gallop put his foot into a gophers hole, and broke a fore leg. Two hundred men groaned out at the sight of the poor beast standing on three legs, after recovering from the fall. We realized that his last hour had come. To leave him alive behind us would be inhuman. There was neither water nor grass for miles around. The wolves would pull him down after a few hours, and he deserved a nobler death, and yet who could have a heart to kill him? Strip off the saddle and shoot him. That was the order that came back from the head of the column, and that was the order given by our Captain to a Sergeant. The saddle was removed; Old Jack must have been in a terrible pain, but he did not utter a sigh. His eyes opened wider then usual, and he appeared worried and anxious as he looked around.

"Capt, I can't do it; it would be as bad as shooting down a comrade," so said the Sergeant, as he stood revolver in hand. A second and a third were named, but they hung back; a corporal stepped out, placed the muzzle of his revolver to Old Jack's ear, but a hundred men shouted in chorus, and he did not pull the trigger. Compliments of Col. Black with orders to shoot that horse at once, announced the messenger from the head of the column. "Sergeant Davis, put the horse out of his misery;" ordered the Captain. "I have got to do it or stand a court-martial," growled the Sergeant, but I would sooner try a shot at somebody down in front; perhaps he isn't so badly hurt." "Hurry up! can't you see that the bone is broken square off?" "It's the same thing as murder, and the Lord will never forgive me for it. "Boys bear me witness that I am forced to do it." Poor Old Jack: he was rubbing his nose against the Sergeant's left hand, and whimpering as if he would inquire what it was all about. Our faces were all turned the other way; many of the men stopped their ears to shut out the report of the revolver, and no one looked back as the column moved on. Looking straight ahead, and with a suspicious quivering of the chin, the Sergeant whispered: "I wish I hadn't done it, I wish I had taken arrest and court-martial instead. Poor old comrade."

Desires to Bear Testimony.

Henry Thorne, travelling secretary of the Y. M. C. A., writes from Exeter Hall, Strand, London, February 2d, 1888:

"I desire to bear my testimony to the value of ALLCOCK'S POROUS PLASTERS. I have used them for pains in the back and side arising from rheumatic and other causes never without deriving benefit from their application. They are easily applied and very comforting. Those engaged as I am in public work which involves exposure to sudden changes of temperature, will do well to keep a supply of ALLCOCK'S POROUS PLASTERS in their portmanteaus."

This story comes from *Our Dumb Animals*: "Will Wadsworth owns a horse that his children drive to school mornings, and upon arriving at the school-house they all go in, leaving the horse to go home alone, which he does, without accident or loss of time. At night Mr. Wadsworth harnesses him to the wagon, and the intelligent animal goes after the children. If he arrives before school is closed he waits patiently at the door until it is out and his charges are all aboard and then conveys them home. The distance that the sagacious brute thus travels alone is more than a mile. Such an instance of intelligence and sagacity in an animal is rare, and can hardly be accounted for on the theory of instinct alone."

The lovers of home and happiness would cheerfully recommend their needy friends to go to the Maine Keeley Institute at Deering for treatment.

The Rochester, (N. H.) Fair is billed for Sept. 25-28.

ELM HILL FARM.

One mile from Cumberland Junction, on the Maine Central railroad, is situated Elm Hill Farm, owned and occupied by H. M. Moulton, M. D., who has one of the finest collection of horses in the state, under the management and training of the popular and well known Mr. G. H. McCoy. The following list will be perhaps of interest to the readers of this paper: Gentle Annie, 17 years old, as sound as a bell today, out of Fanny Russell, by Abraham. The dam of this colt is full sister to Fearnought 2.17½. Fearnought Prince, pacer, foaled in 1891, was very successful as a yearling, starting several times, and winning every race. He was a good two year old last season and should trot in 2.30 or better this season as a three year old. Linwood, pacer, foaled in 1892, was the best yearling out for the money in Maine last season, starting seven times, winning five races and a piece of the other two, taking a record of 1.27½ half mile, winning \$422.50. He is like all Maine Prince colts, handled for speed so far, a natural race horse, cool and reliable at all times. Mollie M., foaled May 1891, sired by Westland 2.20½, by Col. West, by Egbert, by Hambletonian, first dam Grace M., by Harry Knox, by Gen. Knox Jr., by Gen. Knox; second dam Lucy, by Tom Patchen; third dam Flossie, by Winthrop Morrill. Grace M., foaled November 10, 1887, sired by Harry Knox Jr., by Gen. Knox; first dam Lucy, by Tom Patchen; second dam by Flossie, by Winthrop Morrill; third dam S. T. B., by Hill's Vermont Black Hawk, bred by E. Child, Canton Point, Me., and owned by Dr. H. M. Moulton. Maud M., foaled April 10, 1891, sired by Westland 2.29½, by Col. West, by Egbert, by Hambletonian 10; first dam Gentle Annie 2.38, by Hill's Vermont Black Hawk, bred and owned by Dr. Moulton. Emma Westland, one-half mile 1.28, yearling. Joseland, yearling. Annie C., pacer, foaled May 28, 1892, sired by Westland 2.29½, by Col. West, by Egbert, by Hambletonian 10; first dam Grace M., by Harry Knox, by Gen. Knox Jr., by Gen. Knox; second dam Lucy, by Tom Patchen; third dam Flossie, by Winthrop Morrill. Westlawn, foaled April 20, 1890, a golden chestnut, by Col. West, he by Egbert, son of Rysdyk's Hambletonian; first dam Highland Maid, by Startle Hambletonian, by Robert Bonner's Startle, by Rysdyk's Hambletonian; second dam Kitty Homer, by Topgallant, by Rysdyk's Hambletonian; third dam Sally Hoyt, by Hector, by Latturett's Bellfounder, by Trempsis' Bellfounder, son of Imported Bellfounder; bred and owned by Sylvanus Porter. This horse is at Dr. Moulton's farm all the time. Edna T., foaled July 15, 1892, sired by Northcote 3426, by Mambrino Russell, by Woodford Mambrino 2.21½, by Mambrino Chief; first dam Margaret M., by Hambletonian Chief; second dam Daisy, by Dirigo (115) 2.29; third dam Bessie, by Gen. Knox; fourth dam by Thorndale. Emma, two years old, by Whip, Jr., dam Flirt 2.35¼, dam by Windsor Pilot 2.29¼. Auburn Boy, yearling, dam Flirt. Cold Molasses, yearling, by Northcote, dam Gentle Annie 2.38½, by Daniel Lambert.

Horse Owners—Attention.

Andover, Me., July 24, 1893.

The Lawrence-Williams Co., Cleveland, Ohio:

Yours of the 22d at hand and will say in regard to Caustic Balsam, I think it is the best thing on the market for spavins, splints, and all hard bunches. All the leading horsemen of the place buy it of me, and say it is a medicine they would not be without. I have some in stock at present, but shall favor you with another order soon.

F. A. RUSSELL.

The ancient Egyptians shaved the body of the horse every morning.

TRAINING CIRCUS HORSES.

One of the busiest men connected with the big Barnum & Bailey circus is John O'Brien. It is his duty to train all the horses used for the ring in bareback and high school riding. All winter long in Bridgeport, Conn., he is at work preparing the horses for the summer tour of the show. At the Madison Square Garden last week, says the New York Tribune, he was asked how he trained his horses.

"The first thing that we have to do when we get new horses is simply to keep them in the stables with the others until they get used to their new company," he said. "It's a singular thing, too, how jealous horses are of the newcomers. You may laugh if you want to, but horses really have their ways of what I might call 'guying green stock'.

"After the horses get used to their surroundings and their stable companions we blindfold them and take them into the ring. While they are blindfolded we train them to the circular motion—that is, we make it appear natural to them to run around the small ring. This requires a good deal of time and of patience. It generally takes a month to break a horse to this. The natural tendency of the animal is to go straight, and the going around is unnatural to him. Nowadays we use a system of checks and lines which render the process much easier.

"After the horse has been taught to run around we take off the blindfold, and the performer for whom the animal is intended begins to try tricks with him. The horse is naturally very observant, and his natural bent is to do what he sees another horse do; so when we are teaching a horse to do tricks we place him alongside of another who has been trained to give him confidence, and the two work together. The rider will first try one and then the other. It is a great mistake to think that punishment is resorted to as a method of breaking in circus horses. Horses that are broken by violent treatment are not to be depended on, and for ring purposes we must have horses so trained that they can be absolutely relied upon.

"A good, intelligent animal that has been trained for the ring will, technically speaking, 'feel' his rider and accommodate his motions as much as possible to the work that the rider has in hand. Such a horse is the delight of a first class bareback rider; and, by the way, nearly all of the great riders have their favorite animal.

"It may surprise you to know that the circus horses are as sensible to the applause of the audience as are the performers themselves. It is wonderful to contrast what a horse will do under the stimulus of applause with what he will not do when the audience is cold. Horses are likely, however, just the same as performers, to lose their heads when the approval is too stimulating. That is one of the reasons for the several checks and reins that you see circus horses provided with. They are not intended for ornament, as most people suppose.

"A well trained ring horse is worth easily \$1,000. Riders who earn large salaries generally like to give them their personal attention. Generally the riders in the circus who own their own horses make up a pool together for the employment of a first-class groom. A circus horse needs the most careful attention. Prior to every act his back has to be rubbed with rosin so as to prevent the riders feet from slipping. This must be carefully washed off after each performance, or the animal's back would get sore in a short time. A first-class groom has to be, in fact, something of a veterinary surgeon.

"There are really few accidents to the circus horses when one considers the nature of the work that they have to do. We have horses here that have been in training with us for 10 years. The ring work is not particularly wearing upon them when they once become accustomed

to it. It is the traveling around the country that tells on them most. At the same time they get the best treatment. The food given them is of first-class quality.

"I have trained horses that Mr. Barnum, Mr. Bailey and other owners have valued at over \$5,000 simply because of their training. Such a horse must be of good blood. You might think that a horse trained for the ring and kept in it year after year would lose any speed that he might ever have, but we have horses here now that we used in the ring work that could trot a mile in from 2.35 to 2.45."

MOUNT VERNON MATTERS.

There has been quite a changing of horses about here of late. G. H. Poole, W. M. Tyler, E. L. Bean, W. E. Carson, Attie Fairbanks and Charles H. French have each purchased for themselves a nice horse; all good ones. M. S. Gordon of Vienna has the finest pair of matched mares that can be found in this part of the country. They are dark bay, black points, built much alike; respective weight 1105 and 1107 pounds; handsome and fine steppers. A. P. Morse of Mount Vernon has a gelding three years and two months old, and weighs 1480 pounds. She has gained the last six months just 200 pounds without extra feed. He is good proportioned and well broken to work double. His color is all red. He is the largest colt ever raised in this vicinity, and bids fair to weigh 1800 pounds.

PURCHASES IN FRANKLIN COUNTY.

Mr. C. S. Robbins of Phillips has bought of Ira Clay of Portland his trotting horse, Dan C., which trotted two races last fall, taking second money in both, best time 2.32. Mr. Robbins has also bought of Charles Glidden of Lynn, Mass., his standard bred three year old stallion. He is very handsome and stylish, stands 15-1, weighs 950 pounds.

Mr. Robbins has a very nice looking brown mare by Administrator, stands 15-3, and weighs 1000 pounds or more. He has also bought a very nice black pacer of W. L. Jones of Strong, sired by Allectus, dam by Black Monitor. This pacer has nerve, and has been handled for speed, but good judges say he can show a 2.40 clip handy. All of the above, except the stallion, will be shipped the 21st of April to Lynn, Mass.

PITTSFIELD ITEMS.

Harbinger is being handled somewhat these warm days by H. B. Connor, and the old fellow lets out some brilliant links of speed when they will let him.

H. J. Brackett has a fine two year old in Graduate, by Harbinger, dam Kitty, by Smuggler Gift, he by Smuggler. This colt stands 15-1, and is finely gaited. His name is somewhat peculiar, and came about in this way. It chanced that the colt was foaled on the same day that Mr. Brackett's daughter graduated from the Maine Central Institute.

Dr. Drake has sold Pittsfield, by Greenfield, and a yearling by Early Bird, to a Rockland gentleman.

Our Boston correspondent tells us that next week there will be some of the most remarkable Irish Point Lace Curtain bargains ever known in that city. Paine's Furniture Co. will close out lace curtains at 15 per cent. under price. Many of these are of ivory color, very choice and rare, yet offered at only \$3 per pair. Our readers should secure some of these curtains, as they can be ordered by mail.

Hood's Pills are the best after-dinner Pills, assist digestion, cure headache. Try a box.

A CORRECTION.

MR. EDITOR:—It may surprise well informed horsemen to know that imported Messenger was foaled in 1870, (as your printer made me say in the issue of Apr 20th) when he died in 1898 at the age of 28 years, therefore he must have died 62 years before he was born which will not be received, as it purports to be, as historical facts.

I intend to quote history correctly, and your readers can hardly think any one so ignorant of the facts as to make such a statement. Messenger was imported in the latter part of the last century, and was sired by Mambrino foaled in 1768, he by Engineer, by Sampson, by Blaze, a son of Childers, his dam Hip, son of Curwin's Bay Barb. Mambrino's dam was by Cade, son of Godolphin Arabian; second dam by Bolton Little John, son of Partner; third dam by son of Bald Galloway. Engineer was out of Miner's dam, by Young Grayhound, a grandson of King William's White Barb. I think this comes as near giving the breeding of the foundation stock of the American trotter as it is possible to trace it. If I have misquoted anything, shall be pleased to be corrected.

A. A. WAITE.

"It's all bosh, this talk about cowboys learning to enjoy the sport of riding a bucking horse," says a reformed cowboy. "Riding a bucking horse is like having boils—you never get thoroughly used to it. When you hear a fellow say he would like to ride a bucking horse he is either a liar or a greenhorn. The first day I ever went out with a herd of cattle I was dumped nine times because of the presence of the cactus burr in my saddle blanket. I have seen but one man that had grit enough to sit a real bucking horse until it had bucked all it wanted to, and he was bleeding at the nose, mouth and ears when they took him off the horse at end of a half-hour struggle. As a general thing a cowboy will pull a horse's head up, wind the reins around the saddle-horn, take a firm grip on the saddle with his hands, and then rowl the buckler until the animal becomes convinced that it is better to behave than buck.

In horses the pulse at rest beats forty times a minute. It may be felt wherever a big artery crosses a bone. It is generally felt in the horse where it crosses over the bone of the lower jaw in front of its curved position, or in the bony ridge above the eye. Any material variation of the pulse from the above may be considered as a sign of disease. If rapid, hard and full, it is an indication of high fever or inflammation; if rapid, small and weak, low fever, loss of blood or weakness. If slow, the possibilities point to brain disease, and if irregular, to heart troubles. This is one of the principal and sure tests of the health of an animal.

In the autumn of 1877 the present British premier was visiting New York. He was shown round some of the horse sights of the city, and after being escorted over a boarding stable he said "there was nothing like it in London." He was accompanied by a famous turfite who thought it would be a good idea to show the young man something else "they had nothing like in England," this was to give him a spin up Jerome avenue behind a pair of trotters. Once on the road, "Mr. Primrose,"—as he affected to make people believe he preferred to be called—enthused. He vowed he would some day have just such a team for his driving at home.

Purify the blood, tone the nerves, and give strength to the weakened organs and body by taking Hood's Sarsaparilla now.

There are several trainers who will not allow their horses to be worked on Sunday.

TURF, FARM AND HOME

PUBLISHED EVERY FRIDAY

BY THE

TURF PUBLISHING COMPANY

162 Main Street, Roak Block,

AUBURN, MAINE.

E. P. MAYO, Editor and Manager.
G. M. HATCH, Turf Editor.

TERMS:—\$1.00 per year in advance, \$2.00 if not paid strictly in advance.

Entered at the Post Office at Auburn, Me., as second class mail matter.

AUBURN, ME., FRIDAY, APRIL 27.

SOMETHING TO THINK OF.

THE TURF, FARM AND HOME is to-day in touch with more Horsemen in New England than all other Maine Publications combined. Make a note of it.

TROTTING EVENTS TO OCCUR.

[Secretaries are requested to notify THE TURF, FARM AND HOME as soon as convenient, dates selected for meetings. Changes of dates will be made or any inaccuracies will be corrected promptly on notification.]

Ellard 2.12 $\frac{3}{4}$ is the fastest trotting stallion ever produced in Massachusetts, and also the fastest owned in Montana.

* * * * *

Monbars 2.11 $\frac{3}{4}$, out of the Maine bred mare Lady Maud, should go fast at the pacing gait to which he has been converted.

* * * * *

Remember that all colt classes to be trotted and paced at the New England Breeders' meeting next September close May 1st, with C. M. Jewett, secretary.

* * * * *

In a little less than a month the bell will ring at some of the early meetings, and the harness-racing season of 1894 will have begun. That it will be the most brilliant in the history of harness-racing cannot be doubted.

* * * * *

McHenry will have Monbars (3) 2.11 $\frac{3}{4}$, Greenleaf 2.10, Phoebe Wilkes 2.11, Moquette (4) 2.10, May Marshall and others. One such as these would have been a star for any stable a few years ago, but a trainer who hasn't one in the 2.10 class nowadays seems to be but illy equipped.

* * * * *

The stallion, Cushnoe, who broke his leg a few years ago is in prime condition, and is considered one of the fastest in

the state. He is owned by Mr. J. H. Grant of Augusta. His colts too, are showing lots of speed, and are in splendid condition.

* * * * *

Any one who has a spare copy of the TURF of Jan. 19th, will confer a favor by sending it to us to complete our files.

* * * * *

At Fairview it is expected that Ira Woodbury will drive this season. He is the most successful man who ever sat behind Mahlon in a race.

* * * * *

Mr. Charles E. Marston will campaign Fred M. this season as a pacer. He will make some of the side-wheelers wiggle before the season is over, sure.

* * * * *

News comes that Westland that great son of Nelson is having not only a busy season this year in the stud, but his foals of this year are now more promising than formerly and that is high praise indeed. Westland is certainly proving a great sire, and it speaks well for the good judgment of New England breeders that they are availing themselves of his valuable services. To own a Westland colt or filly is to own a valuable piece of property that can any day be converted into cold cash.

* * * * *

Mr. J. S. Sanborn, the genial proprietor of Elmwood Farm, was in town just for an hour and dropped in on us. He has just returned from a trip to the Mediterranean, where he enjoyed a delightful trip, but he had no sooner landed from his steamer than he started for Maine to see his French coachers. He says they have all wintered finely and will make a better show this fall than ever.

* * * * *

On another page will be found a list of the special premiums offered by the society and by individuals to be contested for at the State Fair. The list is a long and complete one, and does the secretary, who has been untiring in his efforts to arrange them, great credit. They should be carefully perused by all our readers, and then the competition for them ought to be most interesting.

* * * * *

We are inclined to think that some of our breeders who rejected to the reopening of the Maine State Fair colt stakes did so under a misapprehension of the facts in the case. Some of them thought that the rule, "5 to enter and 4 to start," applied to the stakes, which is not the case, and the conditions were in plain print and before every man that entered. Now that it is explained the breeders are feeling differently over the matter. A little discussion never hurt any cause.

* * * * *

The horsemen of all others should be interested in the new gospel of good roads. The average country road of New England is a disgrace to the name. The trouble is the roads are too often in charge of men who do not know the requirements of a roadway. A road should not only be passable but it should be free from obstructions for a free and easy passage of teams, both light and loaded. It should also be above all things thoroughly drained so it will not wash at every rain. The matter should be thoroughly agitated until the desired reform is produced.

* * * * *

It now looks as though the reopened colt stakes which close finally the 30th, inst., would see a fine lot of entries and that the races at our next State Fair would far exceed in interest and number of contestants any race ever held in our state. Pacers should most certainly avail themselves of the splendid purses offered for them. The side-wheelers are getting there fast, and have already been heard from. They will play an important part in this year's races all over this country. If you have a colt-trotter or pacer—do not fail to see that he is entered before the 30th, inst.

THE UNCERTAINTIES OF BREEDING.

It was several weeks ago that friend Norcross spoke of this subject in an interesting article, and others have also incidentally approached the matter. While in a general way "like produces like or the likeness of some ancestor," there are influences—incidents or accidents—which furnish a practical demonstration of the fact that variations in any type are likely to occur.

Ever since the days of the patriarch, who took the rods of "green poplar, of the hazel and the chestnut tree," from which rings of the bark had been removed and "set them in the gutters and the watering troughs" with the purpose of causing the ring streaked and speckled of the flocks and herds to increase still more numerous there have been freaks and departures from all established rules, but which may by a proper study be shown to be but the effect of nature's laws.

The sharp practice of Jacob would hardly be commended even in these so-called degenerate days, although Jacob, the principal actor, was aided and abetted by the Creator, yet there is a good object lesson in his striving to make certain that only the stronger animals should come under the influences which he intended should control the color and appearance.

To those who have been interested in noting the "freaks" which will occur in breeding, there are many peculiar and interesting circumstances. One of the events which came under the observation of the writer, in this line, was that of a cow which, being in season, was taken away for service. There are many farmers who believe in keeping breeding animals at work, which happened to be the case in this instance. The bull was being worked in a field adjacent to the buildings, and was bred to the cow while yoked with the ox, his yoke mate. This bull was red in color, with a mottled face—a grade Hereford, while the ox was entirely red. In due time the cow brought two calves, one red and the other with the same markings as his sire. We saw the calves and have no doubt but all the facts were stated to us correctly. There are, however, doubters at all times and places, and we confess to have been asked in a somewhat irrelevant if not irreverent manner if the calves were not yoked at birth, to which we had no reply ready, other than that "we knew they were afterward."

The incident is related to us by a well known Maine gentleman of the circumstance of a coach dog being thrown in a pen where there were one or more breeding sows. One of these brought pigs which were spotted in color like the coach dog, and there was also a different malformation of the foot.

The writer well remembers an instance where in a flock of sheep, all of which were like those of Little Bo-Peep—"Let 'em alone and they'll come home bringing their tails behind 'em," one of the ewes by some misfortune, lost a part of her tail during the winter. The lamb which she produced in the spring was dropped perfect in every respect save that a portion of the tail was decayed so that it dropped off shortly after birth.

Breeders of cattle, Durhams, for instance, have been careful not to have the barns or stables painted white, or to allow their breeding cows to be brought in contact with any glaring white surface for fear that there would not be a desirable color in the offspring. The Durham cattle were very highly bred; the more highly bred the greater the nervous organism, hence the greater likelihood of anything, of a startling nature affect the appearance of the offspring. Many affirm that events occurring at the time of copulation may influence the color, appearance, or temper-

ament of the future offspring, while others affirm that it is only at a certain period of conception that these results are produced. There are many stories in relation to the markings of animals totally dissimilar to those found in ancestors either near or remote, and the explanations therefor, but as many of them are familiar to our readers we forbear.

THE SINGLE JUDGE.

There would seem to be much in favor of the new idea of having but a single judge to preside over trotting races. Patrol judges or an assistant at the distance stand, as well as in the stand itself, may be employed, but let one man have the authority, the responsibility, the praise, or censure, whichever he may deserve. Three men may do better work than one, but the chances are that if the single judge has needed assistance to record breaks as well as all departures from the regulation methods of driving races, his work will be much more satisfactory than if handicapped by incompetency in his colleagues. He will have then no excuse to offer that he was "convinced the race should have been decided differently, but the others overruled him." There will be no attempts to correct some fancied wrong in the start by the other occupants of the stand, and jobs will be a much harder matter to carry through as with the single judge, the allowing of such to be pulled off must prove the incompetency of the judge, or else his dishonesty of intentions which should in either case act as a bar for his further occupancy of the position.

The "prominent citizen" phase of the question will by this be also obliterated from racing contests. It might in some instances allow greater wrongs to be perpetrated, but would on the whole result in improvement in all matters pertaining to the successful carrying on of trotting meetings.

The idea has been advocated and employed in the judging of stock at our fairs, and successfully too. It renders excuses and apologies unnecessary and useless, puts the responsibility upon one. The position of starting judge has become a profession, and a good judge or one who is ambitious, has either a reputation to maintain or to acquire, hence will, when he is alone in the stand, be positive, so far as his judgment and ability extends, to see that affairs are properly conducted.

Dr. Louis Robinson in the current number of the North American Review says that "the reason why the pneumatic tired sulky is worth several seconds to the trotter is not so much because it is of lighter draft, but because practically no vibration is conveyed along the shafts and traces to the horse's body. Even so little vibration will weary his muscles and hamper his movements to a certain extent." Those who have driven on our half mile tracks will believe that there are other considerations in the matter fully as weighty, as for instance, when going around a turn at speed the shaft of the vehicle is thrown against the horse's leg in such a manner as, in many cases, to hamper his movements in no slight degree, even if he does not go to a break. The bike, though new, is now an indispensable.

W. D. Haley's Guy Wilkes mare foaled a fine chestnut filly by Haley on the 21st. Mr. Haley writes that his horses are all looking fine, and adds: We think over this way that the two minute trotter will carry the blood of Haley, and that is sure to please friend Norcross.

The trot advertised for July 4 at Hartland has been changed to June 30, on account of other trots in that vicinity.

A ROYAL ESTABLISHMENT.

RIVERSIDE PARK, LIVERMORE FALLS.

Situated just across the river from the Androscoggin County Agricultural Society's grounds, Evergreen Park, is Riverside Park, Noyes Bros., proprietors, which is fast coming into prominence as one of the finest stock farms in the New England States. The farm is beautifully located on the western shore of the Androscoggin river, and the scenery from the farm buildings is both charming and picturesque. A better location could not be found in all New England. A certain portion of the farm affords excellent pasturage, and as for the other part it is intervalle land and no better soil for tillage is found along the Androscoggin valley.

A large, level field across the road from the house and stables will be converted into as fine a half-mile ring as the state boasts of this season or next, and when it is completed all interested in the light harness horse will be afforded an opportunity to see some of the finest bred youngsters in the world taking their daily exercise on it, for they are to be found at Riverside Park.

The dwelling house, which is modern in style of architecture and stands on a small eminence overlooking the road, has been thoroughly renovated throughout, and is luxuriously furnished. The main barn is a large, commodious building of fine appearance. The right side of it, as you enter the driveway that runs the whole length of the building, is always filled with choice hay, grain, etc., while the left side is occupied by box stalls finely finished in hard pine and fitted up with all the appointments to be found in a palatial equine home. Opening out of this building is a good sized storeroom, and out of that is the office, and it is doubtful if there is a better furnished one in connection with a horse breeding establishment in Maine. It is finished with polished sycamore from the floor to the window casings, harness cases, etc., while the walls are adorned with fine pictures of Nelson 2.09, Axtell (3) 2.12, Nutwood 2.18 $\frac{3}{4}$, Allerton 2.09 $\frac{1}{2}$, and other equine celebrities. Just below this building is the colt stable, containing three large box stalls with paddocks. Another new building contains on the first floor a carriage room and a blacksmith shop, where Sherman, the well known shoer of Waterville, holds forth every month or two, while the second story is used for the storage of apples, for there is a nice large orchard on the farm.

Among the royally bred mares and fillies that can be seen here as soon as they return from the various stock farms in the United States, where they are either being trained or bred, are the following: Lady Nelson 2.25, a large chestnut colored mare by Nelson 2.09, foaled in 1886. This mare will be put in training this season, and Mr. Nelson says she can enter the 2.20 list with ease. Elita Russell 2.29 $\frac{3}{4}$, by Lord Russell, a full brother to Maud S. 2.08 $\frac{3}{4}$, was foaled in 1888. This mare is a sure candidate for the 2.15 list when she is put in training again. It was a damp, rainy day and the track was very slippery when she obtained her present record, and all who were present at the time say she could have gone in less than 2.20, had the track and the weather been favorable. This mare is now in foal to Axtell (3) 2.12, and will be bred back to him this season. The dam of Elita Russell is Eliti, full sister to Elaine 2.20, by Messenger Duroe; second dam the greatest of the great brood mares, Green Mountain Maid. Marinette, foaled in 1887, cost the Noyes Bros. \$4000, and she is worth a mint of money as a brood mare, having produced Queen Regent, for which \$7000 was refused as a yearling, and Regal Nelson, which brought the highest price of any

colt ever sired by the Northern King. As her breeding is well known to the TURF, FARM AND HOME readers I will only give her sire and dam. She was sired by Director 2.17, the sire of Director 2.05 $\frac{1}{4}$, and Direct, p. 2.05 $\frac{1}{2}$; first dam Pantalette, by Princeps. She has been bred to Nelson 2.09 this season. Queen Regent, foaled 1891, by Axtell 2.12, dam Marinette, is now in Budd Doble's stable and is expected to take a record in the teens this season, as she has shown by fast quarters and halves her ability to do so. Queen Regent and Regal Nelson each carry the blood of 13 mares found in the table of great brood mares. Gretta, by Dictator Chief 2.21 $\frac{1}{2}$, was foaled in 1887; first dam Gretchen, dam of Nelson 2.09, etc., by Gideon. Gretta is in foal to Nutwood 2.18 $\frac{3}{4}$, and will be bred back to him this season. Luella Stout, foaled 1892, is a very promising filly by Nutwood 2.18 $\frac{3}{4}$, dam Gretta mentioned above. Cressy, by Nelson 2.09, dam Crescent, by Dictator Chief 2.21 $\frac{1}{2}$, is in foal to Algy 2.19 $\frac{3}{4}$, (son of Nutwood 2.18 $\frac{3}{4}$, and Alpha, by Aleantara) and will be bred back to him.

Besides the above mentioned the Noyes Bros., own a large, well bred Knox mare that might have had a record close to 2.30 now, had she been handled when young, but as she was not she is now used for a brood mare, and she has three or four colts to her credit that would do honor to any dam. The first one she dropped was Violette, by Volute, now at Sunnyside Farm to be bred to Nelson 2.09. The second was by Red Hawk 2.28 $\frac{1}{2}$, and is now owned in Massachusetts. Dictatrix, by Dictator Chief 2.21 $\frac{1}{2}$, is her third foal, and she is the best of them all, if I am any judge. This filly resembles her sire in conformation and will enter the list some day. The old mare, (Knox Maid, I think they call her) has produced one other colt, if I remember right, and is now supposed to be in foal to Brown Rolfe. While Knox Maid is not strictly a first-class brood mare she seems to impart considerable of the "get there" material to her foals, every one of them having plenty of ambition and speed, two great requisites in the make-up of a race horse, and I predict that her progeny will put her into the great brood mare list ere many seasons have gone by.

WM. H. ALLEN.

EXETER RACES.

As will be seen elsewhere the Exeter Maine track will be a busy place this season. Following are the stake races decided upon.

Saturday June 16th 2.50 class \$100, 2.30 class \$100 pace or trot.

July 4th 2.50 class \$100, 2.39 class \$100, 2.25 class \$150 pace or trot.

Aug. 11 2.45 class \$100 2.35 class \$100, pace or trot.

Classes for the Fair Sept. 25, 26 and 27 will be as follows.

1st day three minute class \$100, 2.30 class \$100.

2nd day colt stakes 2 and 3 year olds \$50 each, 2.40 \$100.

3rd day 4 year olds \$60, 2.48 class \$100, 2.35 class \$100 free for all race \$200.

Three of F. W. Hills horses met with a collision while being shipped from Massachusetts to Cornelia. The car they were in backed into a car of sleepers, they were all more or less injured.

F. W. Hill bought of J. Bowman the fast trotting mare Minnie B. he paid a long price for her and she is worth it as she is a dandy.

Hard times or good times, there is one thing that is always in demand—the best. No matter how low the inferior grades—the "seconds"—of anything go: no matter how hard it is to dispose of them, the best will always find a ready buyer.

There are some rare bargains offered in our sale and change columns this week.

A NOTE FROM MR. NORCROSS.

MR. EDITOR:—In answer to your request, I will say that my stock is all well and feeling too well, as I have had this old fellow, La Grippe, hold of me twice in the last five weeks, and the colts have had but little to do, only kick the stalls. I am hoping I will get to exercising them soon, if we have any weather. I shall take seven of them over to Lewiston Park some time in May, as I have the two (year-olds) by Bayard Wilkes engaged in several races and stakes this season. I shall work my horses myself this season. My year-old colts are not as yet broken to harness, but in the yard they show well enough to suit any one that is not in too much of a hurry. I think Bayard Wilkes will be a great sire of speed, and all the colts by Achilles, in this vicinity, are phenomenally good ones—long, handsome, and very fast. If the breeders in the vicinity of Jay Bridge know what it for their interest they will use this horse this year, as it is quite doubtful if he will remain long in Maine, as his colts that are owned in Massachusetts are adding to his reputation every day. The owner of Blanch R. 2.28 $\frac{1}{2}$ and her younger sister, which is full as fast, has refused \$2000 for them. That means a great deal these times, and I know of two 2-year-olds by him that can be sold any day for \$500 each. So you see it pays to breed that kind. I was interested in an article in the Horse Breeder last week showing the disadvantages that Dr. Horr labored under in getting mares to Mambrino Patchen. The Doctor knows more about horses than all the breeders in Kentucky put together. He knows enough to breed for merit and let fashion go to the dogs, and he does more for the improvement of the trotting horse in producing a brood mare sire and a dude Mambrino King than all the breeders in his state put together, but people most generally learn too late. Maine had in her state one of the best brood mare sires that ever lived, if they had embraced the opportunity—that was Fearnought, Jr. He had breeding, speed, beauty, and more nerve than any stallion that ever lived—twenty miles per hour was only exercise for him, and he stood for \$25, but the fashionable scrub, that couldn't compare in any particular with him, got the patronage; why? because the whole of the papers and blowers in the state were in the interest of the fashionable scrub that had pedigree without merit. I don't speak of good horses that are fashionably bred, but the common lot of poultries that have been imported into the state. But to-day the best brood mares that you can find in the state are the few of the neglected Fearnoughts. It gives me satisfaction to know it is so, and that I have been a benefit to some extent in introducing a breed of horses that had merit.

E. L. NORCROSS,

Fearnought Farm,

April 24.

Manchester, Me.

ENDORSED BY THE STATE.

The Turf Management Receives a Handsome Letter from the Agricultural Department.

In the course of a business letter addressed to this office Hon. B. Walker McKeen, the able secretary of the Board of Agriculture, has this to say of the TURF:

STATE OF MAINE AGRICULTURAL DEPT.
Augusta, April 22, 1894.

MY DEAR SIR:—The TURF, FARM AND HOME under its present management is a valuable paper for our state, and is carefully read by me every week. It is as welcome as any paper which comes to my desk. I wish you success.

Yours very truly,

B. WALKER MCKEEN.

A GREAT HORSE FAIR AT RIGBY.

How time flies! The snow has but just left the earth, and we can almost hear the bell ring to call up the horses. The races are now right on us and it will be a busy summer. August will soon be here with the great horse fair at gay Rigby. Already we hear of fast trotters and pacers in Massachusetts, New Hampshire, Rhode Island and even Vermont that will "be there" to contest for the coin. It will surely be a great meeting, far exceeding any ever held in this state. And that reminds us. The ten guaranteed stakes to be trotted and paced there and then should not be forgotten. The entries close for the meet Monday, April 30th. There is not much time to spare if you would be within the circle. Send your nominations at once to J. F. Barrett, the secretary, Portland.

For fear that you may overlook the official announcement made elsewhere we reproduce it here. Isn't it a rich feast for a man with a fast horse? We should rather remark yes.

No. 1. \$400 Commercial Stake, for yearling trotters, foals of 1893; entrance 5 per cent; payable \$4 with the nomination, April 30, \$4 May 30, \$8 June 30, and \$4 July 30, mile dash; distance waived.

No. 2. \$500 West End Stake, for trotters, foals of 1892, and under, eligible to the three minute class; entrance 5 per cent; payable \$5 with the nomination, April 30, \$5 May 30, \$10 June 30, and \$5 July 30; mile heats, best two in three; distance waived.

No. 3. \$500 Sunnyside Stake, for trotters, foals of 1891 and under, eligible to the 2.45 class; entrance 5 per cent; payable \$5 April 30, \$5 May 30, \$10 June 30, and \$5 July 30; mile heats, best three in five; distance 150 yards.

No. 4. \$500 Fairview Stake, for trotters, foals of 1890 and under, eligible to the 2.35 class; entrance, payments and conditions same as No. 3.

No. 5. \$600 Rigby Stake, for trotters, eligible to the 2.30 class; entrance 5 per cent; payments \$6 April 30, \$6 May 30, \$12 June 30, and \$6 July 30; mile heats, best three in five.

No. 6. \$600 Portland Stake, for trotters eligible to the three minute class; entrance, payments and conditions same as in No. 5.

No. 7. \$600 Jose Stake, for trotters eligible to the 2.40 class; entrance, payments and conditions same as in No. 5.

No. 8. \$600 Merchant's Stake, for trotting stallions, eligible to the 2.18 class; entrance, payments and conditions same as in No. 5.

No. 9. \$500 Preble House Stake, for pacers, eligible to the 2.25 class; entrance 5 per cent; payable \$5 April 30, \$5 May 30, \$10 June 30, and \$5 July 30; mile heats, best three in five.

No. 10. Cumberland Stake, for pacers, eligible to the 2.40 class; entrance, payments and conditions same as in No. 9.

A RECOGNIZED AUTHORITY.

(Maine Farmer.)

The TURF, FARM AND HOME as a trotting horse paper is rapidly swinging to the front, and must become a recognized authority among this special class. We would tender congratulations to Messrs. Mayo and Hatch for the great improvements manifest, regretting only that they do not join hands with the Farmer in pushing to the front the just claims of the larger classes and the supreme importance of the road horse industry, one resting upon trotting blood, but covering a wider range of essential qualities.

Any one that lets a first-class mare that has been used in the breeding ranks go over, from the fact that there is a possibility of not being a demand for the foal as soon as dropped, makes a very serious mistake, as he loses one year of that mare's life, unless she can be used on the road or on the turf.

Mr. Charles W. Covell has an attractive advertisement on our last page this week. He is agent for the Kentucky horse shield which is highly recommended by all who have used it. Mr. Covell's store is headquarters for all the latest designs of turf goods.

NEWS FROM THE BREEDERS.

Answers to our Enquiries for the Latest Information.

FROM STRONG.

MR. EDITOR:—I have sixteen horse kind, ten of them belonging to Massachusetts parties. The mares are to be bred to my stallions. I have Beauty Wilkes, a six year old mare, by Allectus, by Alcantara, dam Kit, raised by the late Judge Weed of Barry, Vt. She was by a son of old Morrill, and her dam was by a son of old Morrill. She was the greatest road mare I was ever acquainted with, and a trotter too. It is said she trotted a trial mile before she came to Gloucester, Mass., better than thirty. She was boss on the road while there, and as good style as any man's horse. Beauty Wilkes has had two colts by Alclayone, son of Alcyone, and is in foal to him again. Her first is Silk Wilkes, two years old this May. He ran out last summer; is chestnut, pretty dark, no white, except star. He stands $14\frac{1}{2}$ forward and 15 behind; handsome all over; fine head and neck, well cut up, clean as a thoroughbred. Her next is a large chestnut filly and in the lot can trot by any of the colts that she is with. Black Wilkes is full sister to Beauty. He will be four years old in May. He stands $15\frac{1}{2}$ hands; weighed awhile ago 1040 pounds; a great roader, fast walker and likes to run the hills. Good judges say he is the handsomest colt they ever saw. He has done a good business. He took the blue ribbon at two and three years old at the North Franklin Agricultural Fair.

THOMAS W. BUNNELL.

RIVERSIDE STOCK FARM, NEWMARKET JUNCTION, N. H.

I have received a card asking for information about the horses, etc., at this farm, and in reply thereto would say that the horses are all in first-class shape, although on account of the season being backward they have not had the amount of work we should like to have given them at this time. Tom Marsh gave Vega a mile in 36 on our half mile track a few days ago. All the others were jogged at about the same rate in proportion to their marks.

Vega will start in the 2.18 class in the eastern circuit, and Volley in the 2.20; for the horse fair at Rigby Park in August. We shall enter Zerfino in the four year old stake, Blackstone Brino, who is a full brother to Vega, in the three year old stake, Vega in the 2.18 stallion stake, and possibly also make an entry in the yearling and two year old class, although we think the time of the fair is a little early in which to give young colts the proper preparation.

Tom Marsh will probably have about six Woodbrinos in his string this year, together with several other promising ones. Minnie P., with a pacing record of 2.16 $\frac{1}{4}$, is to be shipped from Kansas to the farm at Newmarket this week, where she will be worked and placed in Marsh's string.

A BETHEL STABLE.

My horses are in fine shape. I have six in charge now. Owoissa is in fine form and acts nicely. I shall stand him till August 1st, then I shall trot him; also Tommy F. and Onawa Jr., and I have two fast two year olds I shall trot some I think. They are fast. One is by Warrener, one by Owoissa. Don't know what else I may have. I drive my own horses. I will give you a few of my ideas in regard to the stallion business, as I think there is a chance for some talk on that subject. First, I think it is a good time to raise colts, but a poor time to pay very high prices for service fees, but still breed good stock. According to my idea Maine stands nearly at the head for good horses, although by the many letters I have received the past six months inquiring for good horses, goes to

show that the good class of Maine horses are getting thinned out. I believe the time has come when good stallions and mares should be used for breeding purposes. I believe there should be a law that no stallion should be kept for service that can't trot himself into the list. We never stand any of our stallions until we know they can trot in 2.30. There is too much of the cheap stallion business. There are plenty of men that think if they can get a colt or horse that will squeal like a stallion, and they get a little pedigree oil on their tongue and start out and beg trade at two or three dollars, they are doing a big business, but on the contrary they are ruining the country's horses. There is plenty of speed nowadays among stallions, and the price should be in reach of all breeders and farmers. I stand Owoissa for \$15. He gets fine colts, and there is no better styled or finished horse; is safe for a lady or child to handle or drive, and I will match him to go 18 miles in one hour, or trot a mile in 2.25. This constitutes a good horse and gives my idea of service fees. In this way in a few years we shall have some gentleman's driving horses for the Boston and New York markets.

G. W. FERNALD.

A GOOD UNITY STABLE.

Mr. G. B. Pillsbury of Unity has a stable of well bred horses and colts. Baymont Chief 2919, record 2.30 $\frac{3}{4}$, heads the list. His sire was Gen. Withers, and his dam by Gen. Knox. After a short season in the stud he will be sent to Guy C. Edwards for a record. It was Mr. Edwards who gave him his mark last fall, and many who saw the race believe that he deserved a lower one than was given him. Mr. Edwards is confident he can bring him down to the 20's this year. Next is a bay mare, an own sister to Baymont Chief, 15-3 hands, and weighing 1050 pounds. She is a sweet driver and ought to be developed. Next is a pair of black colts by Baymont, out of Knox mares. They are well mated and very handsome. He has four standard bred mares sired by Gen. Withers, Dictator Chief, Gideon and Baymont Chief. There are also two yearlings by Baymont Chief, one out of a Gideon mare and the other out of a Knox mare. They stand 14 and 14-1 hands and are finely gaited. A two year old filly by the same horse, out of a Morgan mare, an own sister to Ashmont, that was sold to Halifax parties for \$300 as a two year old and trotted a mile in 2.35, but died that fall as the result of a surgical operation.

PROSPECT NEWS.

Mr. I. F. Gould of Prospect arrived home from Lynn, Mass., Saturday with the fine bred stallion Blue Wilkes, owned by Mr. William La Croix. Blue Wilkes was sired by Wickliffe 2520, by George Wilkes 519; dam Waterwitch, by Blue Bull 75, her dam by Tom Hal 3000, thus it will be seen that Blue Wilkes is a standard bred horse. He is a beautiful bay, $15\frac{3}{4}$ hands high, black points, weighs 1100 pounds; born June 1, 1888. He was brought from Kentucky one year ago by Mr. La Croix. He has never been trained but last year could show better than 2.20. He will be kept at the farm of I. F. Gould, Prospect, Me., at the low fee of \$15 to insure.

FROM WINTERPORT.

MR. EDITOR:—Seeing a mistake in a number of papers in regard to the breeding of the stallion I recently purchased of Mr. Coffin, I thought it would be as well to rectify and give a description of him at the same time. Ledo Jr., not Leeds Jr., is a dark bay horse $15\frac{3}{4}$ hands high, 1035 pounds weight; sired by Ledo 2.35 $\frac{1}{2}$, by Old Ledo, by Hambletonian 10; dam by Messenger Knox, by Black Sultan, by Gen. Knox; second dam by Gen. Knox. Ledo Jr., is a horse of great

beauty of form. He carries himself like a boy with a new suit of clothes, and the person who handles the ribbons can't imagine any poor folks in their family. He moves with a pure, powerful and frictionless stroke. His former owner, Mr. Coffin, is a man whose time is so occupied that he could not give this horse the handling he ought to have, therefore his speed has never been developed, but I think he will prove a fast horse. Four years ago I concluded to buy a brood mare, as I had always been a lover of horses from childhood. Having had the misfortune to lose the mare I had for a brood mare, getting only one colt from her that showed speed, I took the horse fever, and, as I said before, concluded to buy a brood mare. My choice was a five year old Ledo mare $15\frac{1}{2}$ hands, 1000 pounds weight, and nerve, "holy smoke," she was a steamboat in disguise, no road being too long for her: I mated her with Day Dawn, a large gaited son of Judge Advocate, and the produce was a dark bay filly that showed to such good advantage that I had to refuse \$125 for her at four months of age from the leading horseman of my town. She is now two years old, large, strong and handsome, giving promise of becoming a very fast mare, with the nerve and staying qualities her dam possesses. This gave me courage, and hearing that Lumps 2.21 was to stand in Bangor the season of '93, I drove my mare to Bangor and mated her with the son of Geo. Wilkes 2.22, and April 5, 1894, she dropped a dark bay filly with two white ankles, that stood at birth 40 inches high, and smart as a trap. Now I shall wait to see if I have been building air castles on the blood of Rysdyk's Hambletonian or not. If I have I will hitch them to a plough, a sader but a wiser man.

FRANK HARDY.

MAYBERRY FARM, CASCO.

The season of '94 at Mayberry Bros.' Stock Farm opens with as fine a line of young trotting stock as can be found in the country. The proprietors, C. C. and F. P. Mayberry of 28 School street, Boston, do everything in their power to breed the best blooded horses. This farm is situated at the head of Pleasant Pond, only 27 miles from Portland, with fine driveways in the vicinity. The main stable is 300 feet long, containing a nice dirt driveway for winter use the entire length of the building, and in summer they use the one-third of a mile track around the stable. The facilities at the Mayberry farm show that they are the very best, and the manager, Mr. Fred W. Mayberry, takes the best of care of all horses under his charge, with the aid of Madison Hamlin. They are both intelligent horse trainers.

Having given the reader a brief description of the farm I will take first No. 83, Alcantara, four years, 2.42 $\frac{1}{4}$, chestnut stallion, star and white stockings on both near legs; bred by T. H. Kelliher at Highlawn Farm, Lee, Mass.; foaled May 5th, 1889; sired by Alcantara 729, 2.23. Alcantara is a direct descendant of such sires as Hambletonian, George Wilkes, Mambrino Patchen, Volunteer and Gen. Knox, and of the great brood mare Alma Mater, through her best son, Alcantara. Alcantara is a good horse and is producing some fine stock. Alcantara, by Alcantara 2.42 $\frac{1}{4}$, is one of his best colts and is owned by the manager. He is entered at the Lewiston State Fair this fall and will carry off first premium. No. 86, Atkins' Dictator, seal brown stallion, $15\frac{1}{2}$ hands high, bred by B. B. Peak. Georgetown, Ky.; foaled in 1882; sired by Dictator 113. This horse has never been handled for speed but shows a good gait and is an excellent horse to breed from. Atkins' Dictator's sire, Dictator 113, is a full brother to the noted trotter, Dexter 2.17 $\frac{1}{4}$. The stallion, Glen Eagle, owned by Madison Hamlin, will spend this season at Mayberry Farm.

We will now take the brood mares.

First we find No. 87, Nellie Nelson, bay mare, star, off hind pastern and near hind ankle white; bred by F. D. Upton of South Newmarket, N. H.; foaled in 1888; sire of Nelson 4209, 2.09. Miss Nelson is a handsome bay mare, of fine build, and we can't say anything of her sire, Maine's famous Nelson 2.09. No. 89 is next on the list, Clytie, standard, bay mare, small star, black points; bred by Allen Varney, Alton, N. H.; foaled April 19, 1889; sired by Onawa 1402, 2.22 $\frac{1}{4}$. Onawa is a son of Goodwin's Hambletonian 804, by Hambletonian 10, sire of Dexter and 40 others in the 2.30 list. Clytie is the daughter of a producing sire and dam, and is a full sister to Flossie M. 2.29 $\frac{1}{4}$. Miss Wilson, No. 91, is a black mare, star, and a little white on inside of near hind foot, foaled in 1882, sired by Black Harry Clay 70, 2.37 $\frac{1}{2}$. This mare is a good roader and fast walker, and is an excellent brood mare. No. 92, Smugline, bay mare, bred by Col. H. S. Russell, Milton, Mass.; foaled in '76; sired by Smuggler 927, 2.15 $\frac{1}{4}$. Produce: 1888, bay filly, by Red Joe; 1890, bay filly, Lady Pauline, by Messenger Wilkes; 1891, bay colt, by King Carlos; died; 1892, missed to Racewood 11529; 1893, Elcantrix, by Alcantara. Smugline is a good formed mare, with an intelligent eye. Miss Kent, No. 93, sired by Kent 5560, a medium sized, bay mare, bred by John Diggins, Weathersfield, Vt.; foaled in 1878, dam a Morgan mare, raised in Vermont. Polly, 94, chestnut mare, star, and hind pasterns white, bred by Gideon Cook, Casco, Me.; foaled in 1881, sired by King George, son of Hampton 201. Here is a mare that will show you good speed and is an extra good brood mare. No. 95, Virginia, standard, bred at Dixmont, Me.; foaled in 1885; sired by Gray Dan 2127, 2.31 $\frac{3}{4}$. Virginia is a heavy bay mare with good, easy action.

The following young stock were bred and raised at Mayberry farm: No. 96, Lady Pauline, standard, bay, nose and hind pasterns white; foaled August 19, 1890; sired by Messenger Wilkes 3743, 2.23. Gail H., No. 98, brown, star, black points; foaled April 19, 1890; sired by Alex. Patchen. Gail H., is a large mare of her age and has a good form. Edith M., 99, brown, star, white spot on nose, and white ankles behind; foaled April 25, 1891; sired by Mascot 12537, 2.34 $\frac{3}{4}$. Her third dam, Molly Morgan, shows she has a very strong Morgan inheritance. No. 100, Grace M., sired by Mascot 2.34 $\frac{3}{4}$; foaled April 30, 1891. No. 101, Ella M., is a bay, with black points, no white; foaled April 25, 1891, sire of Mascot 12537, 2.34 $\frac{3}{4}$; first dam Betsey, a Black Hawk mare from Vermont. Lou Kent 102, is a bay mare with white face. She was bred by J. B. Woodbury, Saugers, Mass.; foaled May 23, 1891. Miss Kent will spend this season at Mayberry Farm. No. 103, Annacantrix, sired by Alcantara; first dam Miss Wilson. Annacantrix is a chestnut, foaled June 4, 1892. No. 104, Margarie Dore, standard, bay, white near hind ankle; foaled April 14, 1892; sired by Mascot. Lottie Kent, 105, standard, foaled May 23, 1892; sired by Osearda 13187. No. 106, Juliet, foaled May 8, 1892; sired by Mascot 12537, 2.34 $\frac{3}{4}$. She is of good style and finish. No. 107, Dorothy, bay, star, and near hind ankle white; foaled May 1, 1892, sire of Mascot; first dam a fast mare from Massachusetts. No. 108, Nelscot, bay colt, star, foaled Aug. 28, 1892; sired by Mascot; first dam Nellie Nelson. Nelscot carries the blood of the great Nelson through his dam, and of the little horse Onawa through his sire. Milton W., 109, bay, star, foaled May 19, 1892, sired by Mascot 12537, 2.34 $\frac{3}{4}$, son of Onawa 1402, 2.22 $\frac{1}{4}$.

A. W. FOLSON.

Horses are supposed to stand all the time during a sea-voyage, and, in fact, they will not lie down, being moved by that instant which teaches them that if they lie down they may not be able to get up again.

HORSE HAIRS.

Ed. Bither will condition the Allen Farm horses over the Charter Oak track at Hartford, Conn.

The dam of Nelson and the dam of Aubine have been bred at Sunnyside this year to Brown Rolfe, a son of Young Rolfe.

Mr. B. B. Merrill of Brewer sold two fine colts last week. One a grey pacer, by Elation, went to Massachusetts, and the other, a bay trotter, was purchased by Waterville parties.

Matters are booming with Mr. Jonas Edwards, the Auburn horse dealer. He has so many orders in that he was obliged to order two carloads of horses to fill the demand this week. Prices rule very low, however.

Howard Gould of Portland has purchased of J. O. Haines of Skowhegan his stallion Bay Fearnought, paying therefor the sum of \$1500. The horse is in prime condition and will be campaigned. A low mark is predicted for him.

Directum is being jogged daily on the roads from ten to fifteen miles a day at a good stiff jog, and given several miles on a quarter mile track twice a week at a 2.40 gait in the stretches for a scrape out. He has filled out considerable and is a heavier horse than last year.

A western breeder who has given the matter no little attention, declares that there is no better paying business in the world today than the breeding of trotters and pacers if it is gone into with the same business tact and caution that governs the management of other large interests.

Messrs Fred Pierce and James Nason of Mechanic Falls sold to Boston parties last Saturday, their matched pair of mares. They were as fine a team as has been seen in this section for a long while, color brown and could road 10 miles an hour easily, and afraid of nothing.

On another page will be found the advertisement of S. J. Murray, who has received some of the finest horses in Maine. It is very gratifying to learn that these sales are well attended, and all who have purchased, say that every thing stated in his advertisement is found to be true.

Dont fail to attend this sale, it will pay you. Mr. Murray stands high in the estimation of all who has had dealings with him.

Says an exchange: "Some owners of good producing stallions remark that it will do them no good to advertise their horses, but they are the first to complain if you fail to report the doings of their horse's get, but we are glad that all breeders are not so 'hoggish.' A great many realize that the turf journals of the country have made them what they are, and they are willing to contribute to these papers, realizing that they will still further advance their own interests."

A fine colt called Fairview, is owned by Charles Loomis of Skowhegan; sired by All-So 2.20 $\frac{1}{4}$, out of a mare by Skowhegan Boy, he by Gen. Knox. He is four this spring, stands 16 hands and weighs 1100 pounds. He was trained about 60 days last year as a three year old and trotted a mile on a half-mile track in 2.33 $\frac{1}{2}$, and could have gone in 2.30 but met with an accident which threw him out of training. It was not serious, however, and he will be trained again this year.

ONEIDA (N. Y.) NOTES.

Mr. Editor:—The Oneida Driving Park Association held their annual meeting in the Madison House parlor on Thursday evening April 19. President Garvine called the meeting to order at 8.30 o'clock and the following officers were elected: President A. L. Garvin; 1st Vice President, William G. Nixford; 2nd Vice President, Burton G. Foster; 3d Vice President, Charles H. House; Treasurer, Julius M. Goldstein; Secretary, J. Frank Aldrich, assistant corresponding Secretary, J. Arthur Sherman, John V. Richardson was made superintendent of the track with one assistant. It is the intention of the officers to make some needed improvements about the track such as erecting new grand and judges stand and building new stables. It was also deemed advisable to arrange for a programme of races to be held the last of May.

J. D. Crummers of Camden has sold his fine chestnut gelding "Barb Wire" to parties in New York city for a fancy price. The animal will be shipped to Europe very soon where he will start in a circuit.

Johnson and Clark's bay mare Senateress may go to Syracuse to go through the Central New York circuit. The mare is in fine condition and is liable to go a fast clip this year.

C. O. Baily of Waterville has a good string of horses this season, among them C. O. B., Cornelia Wilkes, Flora B., Dainel Lambert and others which he will take through the circuit.

McFADDEN'S PEDIGREE BOOK.

Every breeder of good stock should use this book. The most simple, compact and correct method of recording pedigrees ever used. Published in book form, neatly bound in cloth, 100 pedigree-blanks in each book. Price \$1.00 per copy, sent postage paid, to any part of the United States or Canada. Send for illustrated circular to TURF, FARM AND HOME, Auburn, Me.

The fact that the Tenney improved stallion shield is truly a meritorious device is proven beyond a doubt, for it has been a success ever since its first appearance two years ago. Tenney & Co., Newburyport, Mass., manufacturers of this device, have had and are getting innumerable letters every day from gentlemen all over the country who invariably speak of its merit and that their money was well invested when they bought one. They have an ad. on another page showing the shield in position and giving many other particulars concerning it.

It has been found that with thought-bred and trotters not only the feed but the training must be kept up as well, or they soon get back to the same condition as Arab. Development of the parents will be required with the trotters and pacers to produce uniformly successful campaigners at either gait.

The American Trotting Register Association Company showed its confidence in the ability, integrity and faithfulness of J. H. Steiner by re-electing him secretary at its late meeting in Chicago.

The one thing that prevents two horses of equally fast records meeting together in a decided match, is the inevitable fact of one of them coming in second best. No horse-owner wants that place for his champion.

Docking has been for some time forbidden in the British army, and the order has gone forth that short tailed horses are not even to be purchased for remounts.

It is our proud boast that THE TURF is today in touch with more horsemen in New England than all Maine publications combined. A boast that can be supported by the facts too.

CARE OF COLTS IN SPRING AND SUMMER.

"As the twig is bent so is the tree inclined" is about as true of horses as it is of trees, and we all can make up our minds that if we give the best-bred colt on earth scrub care in his earlier days we will never have anything but a scrub colt while he is young and a scrub horse after he grows up. A contemporary took us to task for saying that the public would not buy thin horses. Notwithstanding our contemporary's facetious remarks, the fact remains that the public will not buy thin horses, does not want them, in fact, at any price, nor yet does it want what a starved colt grows up to be. It is an old maxim amongst breeders that the flesh which is born on any young animal should be kept on it, which is as true of horses as it is of cattle, sheep or swine. The breeder, then, must make arrangements to keep the foals in good flesh. For the first few weeks of their existence the youngsters subsist entirely on their mother's milk, and to insure a copious flow the mare must be well fed. Some time ago a gentleman of the writer's acquaintance exhibited some extraordinarily well-furnished foals and was taxed with stuffing them with cow's milk. In reply he said that he did use cow's milk, but he fed it to the mares and the foals got the benefit of it. This, of course, was nonsensical, but it contained a lesson, which was that to have fat foals you must have well-fed mares. The ration advised in a previous issue to be fed to mares before foaling does just as well for them after foaling, being exceedingly nutritious and supplying plenty of milk. When a foal is two days old, if the weather is good, he and his dam should be turned out into the sunlight; the foal will, of course, stagger around and possibly fall a time or two on making his first acquaintance with the wide, wide world, but sunlight is essential to the growth of any young animal, and the more a foal can have of it the better he will be off, providing, of course, that he has a good dry yard to run in. Just as soon as he displays any desire to nibble there should be fitted in the mare's stall a little feed-box and a handful of crushed oats and bran put in it. It is surprising how soon he will learn to eat it. The oats should always be crushed, though it is seldom done. The crushed produce more growth and are easier on the youngster's stomach. As soon as the grass grows green the foal and his dam should be turned out, care being taken at first to bring them in at night and to prevent them being exposed to severe rain storms or chilly weather.

It is the general custom to stop feeding grain to mares and foals when they go out to grass, but there never was a more vital mistake made. The grain and hay they have been eating during the winter and spring is a great deal more nutritious than the grass, therefore, when the grain is suddenly cut off they lose flesh, and do not regain it all summer. Under the conditions of domestication a mare can raise a foal on grass alone, but she will raise a bigger, stronger and better one if she has a feed of grain—bran and oats—even once a day. To obtain the best results not only with the foal she is nursing, but with the one she is carrying, a brood mare should have in the summer a feed of grain morning and night. It need not in the flush of grass be a heavy one; two quarts of oats and a quart of bran twice a day will more than pay for itself in the strength and growth it produces. There are men who own horses who would get mad in a second if they saw a boy whipping a cur dog, and yet they will turn their mares and foals out into a bare pasture and let them stay there all summer, tortured beyond endurance by flies and sunburn. They never think of erecting a pole-shed, and when they see the band grouped together, stamping and switching, they curse the luck and the flies, and condole with one another

over the loss occasioned by the mares and foals running down in flesh. Should the pasture run short on account of the dry season, they condole with one another again, rarely thinking that a few quarts of oats, fed night and morning from the time the mares were turned out in the spring would have prevented the loss of flesh. The ideal horse-pasture contains wide-spreading trees and running water; many of them, however, have neither. In such a case, a shelter should be built under which the mares and foals may stand in the heat of the day and into the darkness of which the flies will not enter.

Then there should be constructed an enclosure to which the colts may gain access, the fence being so constructed as to permit this, but to turn back the mares; and inside there should be a trough containing a supply of grain—oats and bran—so that the youngsters may nibble at will. They will not eat to exceed a quart apiece per day and oats so fed will certainly net the breeder a dollar a bushel. The writer, when in charge of a large stock farm, constructed a field for this purpose, in this wise: A number of stout posts were sunk in the ground so that nine feet of their length was above the surface in the middle row and seven feet on the two outside rows. Poles were cut in the woods and used for plates and rafters, the whole being thatched with marsh hay. The dimensions were about twenty by thirty feet. Around the post in the middle of the shed was built a manger; at a distance of about seven feet from it fence posts were sunk and a single rail nailed to them scant four feet from the ground. Crushed oats and bran were kept continually in the manger and the colts very soon learned to spend the most of their time in the shelter of the shed and to take a bite when they wanted it. The south and west sides of the shed were walled up with poles and hay, and the northern and eastern exposures were left open, thus excluding the midday and afternoon sun and allowing the breeze to pass through. In the adjoining field the colts owned by a neighbor breeder ran all summer long without any shelter, without any grain, and the difference between the two lots in the fall was so noticeable that it was hard to believe were equally well bred. As a matter of fact the foals were mostly by the same horse. The lot which had grain and shelter were large and sleek and fat, and liked to play and trot; those which were starved and hair two inches long, every rib showed plainly, they did not weigh half what the others did and instead of moving around were content to stand still, except when vainly trying to eke out their wretched living on the bare, brown field. The object lesson, however, was enough for their owner, and next year his mares fared a great deal better. The question of providing adequate shelter for mares and foals during the summer is a most important one and deserving of more attention than it generally receives. It is barbarism of the worst kind to compel horses to stand out all day in the burning sun and in addition the breeder who permits it is willfully curtailing his profits, for every ounce of flesh costs so much to make, and if it is allowed to fall away it costs that much more to get it back again.

In addition to the grain ration mares should have some succulent green food in the end of August or the beginning of September, or whenever the pasture becomes very short. It is, comparatively speaking, little trouble to plant in one of the fields adjoining the pasture several rows of sweet corn, which rushes up early and when fed green, stalks and all, is keenly relished by all classes of live stock. A man will cut and throw over the fence enough sweet corn in half an hour to give twenty brood mares and foals a hearty meal, and the increased flow of milk produced by it will do won-

ders for the colts in the way of keeping them in flesh when the pasture is short. The foals will also eat considerable of the green stalks, and it is not a bad idea to have a man carry a good armful into the colts's shelter and leave it for them within their pen. If the sweet corn is planted intelligently a constant succession of green succulent food may be had until field corn is in the silk or if desired, right up to cold weather, which is the best plan to pursue. The sweet corn varieties are the best for fall feed, Stowell's evergreen being the most prolific of leaves and consequently the best adapted for this use. Ordinary field corn is too tough and woody and too rank for horses to relish. These simple matters of feed and care will enable the breeder to get the best that is in his horses.

Foals should be halter broken when two days old, if they are all right in every way. A little headstall should be slipped on them and a piece of a strap about a foot long attached to the ring. This the owner or attendant can catch at will and speedily teach the youngster the purpose of the halter. When they have got steady on their pins they should be tied up and have a chance to get reconciled to the new sensation before gaining much strength. It is easier done then than at any other time, and the halters may be left on them for a while after they are turned out. It is not altogether well to leave a halter continually on a foal's head during the first summer, but it should be replaced from time to time for twenty-four hours at a stretch, so that they may not lose their acquaintance with it and its uses. All summer the feet of both mares and foals should be attended to; they should be pared out, chipped down and rasped even and not allowed to grow into all sorts of shapes as is so often the case. It is not much trouble to do this, and often saves a big bill of expense. Often times a fault may be corrected in the foal's foot at this age, which if allowed to develop and stiffen, may seriously detract from his value as a horse.

Should any of the mares or foals be injured they should be taken to the stables and treated at once. Frequently it happens that some of them get torn with wire or snags or otherwise lacerated, and the wounds become favorite points of attack with the flies, which invariably causes excessive suppuration and always leaves a scar. If the animal is taken home and confined in a dark, airy place, the wound dressed with antiseptic ointment, it frequently heals by the first intention. All this, of course, entails a great deal of trouble in one way and another and the expenditure of some money. The expense, however, is fully warranted by the improvement wrought, and a big profit is always realized. The idea that in summer mares and colts need little or no attention prevails generally, but is erroneous and costly. They should have as much attention in summer as in winter.

Harking back to the necessity of keeping regular brood mares in good condition while on pasture by the use of additional food, a word or two might be said as to the desirability of letting some of the mares run over occasionally so as to give them a rest from their reproductive labors. To keep a mare suckling a colt and carrying another year after year on nothing but grass from April to November is the worst policy possible, and is bound to shorten her life as well as to seriously lower the class of her foal. The tremendous strain on the dam's vitality is seen in the speedy deterioration of the progeny of mares which get away from their owners on the plains. Their foals never are as good as their dams. The general inferiority of range horses may be traced directly to this, its main cause. It stands to reason that if a mare be fed a ration of grain in addition to

what she can pick in the pasture she must be able to give more milk and to impart more strength to the growing fetus. It is best to let the mares up occasionally and give them a rest, though the necessity for this becomes less urgent if they are well fed at all times of the year. So good an authority as Charles Marvin advocates this practice, and while it may seem almost like throwing money into the fire to let a producing mare go idle for a season, the writer honestly believes that her subsequent colts will be so much better that they will amply repay their breeder by increased excellence for the time and money apparently lost. The writer always maintains that the prosperity of the farm is tied up in the brood mares, and while this article has drifted from a consideration of the care of colts in summer to that of the mares, the subjects are so much akin that little apology is necessary. The difference between even fairly good care and really good care is so marked in results that it cannot be too strongly urged on breeders to let the mares want for nothing that can possibly conduce to their success as producers. Horse-breeding is like every other business. There is no time when the manager's vigilance should be relaxed. Economy is, moreover, not synonymous with penuriousness. The man who starves his horses to save a few dollars in cash is only stopping the barrel at the spigot and letting its contents run out at the bung hole.—Chicago Horseman

JERRY, THE HORSE.

Mrs. Cavazza's Remarkably Intelligent Pet.

In Mrs. E. Cavazza's entertaining paper, "Jerry: a personality," in the April Atlantic, she thus writes of some of the characteristics of her favorite.

Jerry is an admirable, comedian. Once, well meaning but misguided, I offered him some carrots. It was fine to see his scorn of the vegetable. He sniffed contemptuously, shook his head, and tossed the carrots from the basket, and trampled upon them in a wardance. But it was told me after I had left the stable that Jerry picked up the carrots and ate them with good relish. It had been simply that he expected choicer gifts at my hand.

He owns a blanket and hood, gold color, and by me embroidered with his respected name. He is proud of it, and who knows what satisfaction he feels when, as he passes along the street, the populace admiring, reads aloud, Jerry! His self-esteem demands good clothes, so much so that one day, as I came into the stable yard, Jerry told me by means of whinnying, beating his hoofs, shaking vigorously in his teeth the rather ancient blanket which had been hastily thrown over him, that he wanted his own cover, and not any common rag whatever! So his Australian friend kindly brought the robe,—observing however, that Jerry had not protested until my arrival. Arrayed in his good blanket, Jerry looked around with pride, and carressed with his nose the hands that had attired him.

Another comedy of which Jerry was stage manager was a five o'clock tea, admirably enacted. He had eaten all the apples and sugar from my dish-shaped basket. Then he had a luminous idea: He took the edge of the basket in his teeth, and with a polite bow, proffered it to the Australian. It was accepted with thanks. Then Jerry took it again and with another bow presented the Barmecide feast to me. I had not assisted at social functions for nothing, and received his civilities with many compliments. The tea party lasted for several minutes. Jerry was quite impartial in his attentions and the affair was most enjoyable to everybody concerned.

It is very tantalizing when Jerry turns upon me his beautiful eyes and whinnies

half a dozen phrases with a charming variety of intonations. He is telling me something which I am greatly interested to hear; but the density of human non-intelligence is like a fog between Jerry's mind and mine.

One morning he walked beside me, a courteous escort, talking of the fine weather and of the news of the day. "What you say, Jerry," I answered him, "is not only true, but also finely expressed. What a pity that I'm too stupid to understand it!"

Another day as I entered the yard, Jerry stood there harnessed. He immediately began the recital of some pleasant occurrence; whinnying, moving his ears, and tossing his head with evident delight. One of the men came from the stable and asked me, "Has Jerry told you the news?"

"He has; but I have not quite understood."

"He had his photograph taken this morning. A man with a camera came into the yard and I said, 'Jerry is such a good horse he ought to have his picture taken. So we put on his best blanket and he stood for his likeness. He was very pleased about it.'"

On another occasion Jerry by means of his silent language, helped me out of a little dilemma of equine society. He had been eating fruit and sugar from my hands; and in the basket there remained only a few bits of sugar, when one of our friends, a black horse, trotted up for a share of the treat. I knew by experience that the black horse liked apples, but not sugar; so that there was nothing for him. "I am so sorry, Wally," I told him, "but Jerry has eaten all the fruit, and you do not care for sugar. The next time you shall have a fine apple, if you will go away now."

The black did not comprehend; he kept gently pushing his nose against my shoulder. It was grievous to disappoint the good animal. With a sudden impulse I said to the roan, "You, Jerry, know both languages. Please tell Wally that I am very sorry that the apples are all eaten; but if he will go away now, in patience, to-morrow I will bring him a large red apple for himself."

Jerry looked at me, as if to take the message, then approached his nose to that of Wally. It appeared to me that the current of intelligence was almost visible, something as the warm air is seen to pass in transparent ripples along the outside of a heated iron pipe. The message repeated, Wally glanced pleasantly at me as if to accept the terms of my offer, and then trotted away. Needless to say that the next day he had the promised apple, and of the largest and reddest.

SALEM HORSES.

Mr. George W. Harris of this town has wintered three horses, a mare sired by Hind's Knox, he by Gen. Knox; color black, with two white ankles behind, stands 16 hands high and weighs 1100 pounds. This mare has raised two colts which Mr. Harris now owns. One a bay filly, three years old this spring, two white ankles behind, stands 16 hands high, and a nice gaited one, sired by All-So 2.20 1/4. This colt has been entered in all the races in our county as a yearling and two year old and has won a portion of the money in every race she was in. She will be entered this season in all the races in the county of her class, and is expected to win her share of the money. She is showing more speed this spring than last and a nicer way of going. The other colt, an own sister to the former, is a bay filly, black points, one white ankle behind, one year old April 20, 1894, stands 14 hands high, sired by All-So 2.20 1/4, and a good shaped one and as nice a gaited one as anybody has got; dam by Hind's Knox, he by Gen. Knox.

This one is not broken to harness yet, but will be and entered at the Breeders' meeting, Farmington, Me., Franklin county, when it occurs, the date not being fixed yet.

READER.

A man who has a horse for sale makes as big a blunder in over rating his abilities, as he does in under rating them. As a rule, the horse will not be purchased on the strength of what some one says about him, but on the judgement of the purchaser when he comes to look him over. If the owner has painted the picture of a very beautiful horse of fashionable color and lots of style, and first glimpse of the animal shows him to be a short legged animal, threatened with great age, the would-be buyer becomes disgusted and does not want such an animal at any price, for he feels that he has been deceived on the start. Tell it just as it is, gentlemen and your chances of a sale are much better.

Ill-fitting collars produce great distress to the horses, besides loss of pulling power.

SPECIAL PREMIUMS

OFFERED BY THE

Officers of the Maine State Agricultural Society

AND CITIZENS OF THE STATE.

BY S. G. JERRARD, PRESIDENT.

For best pair one-year-old steers, raised, trained, and exhibited by boy not over 12 years old, quality and training to be considered in making award, two or more to enter - - - 1st, \$6.00, 2d, \$4.00

BY ALONZO LIBBY, TRUSTEE.

For the first colt in the Trotting Colt Stakes, one, two, three or four years old, that breaks the state record or distances the field, - - - - - \$10.00

BY A. J. LIBBY, TRUSTEE.

For the best pair one-year-old steers, raised by boy under 10 years of age, to be trained to cart, training to be considered, - - - 1st, \$5.00, 2d, \$3.00

For best thoroughbred two-year-old heifer, - - - 1st, \$2.00, 2d, 1.00

BY H. WESLEY HUTCHINS, TRUSTEE, AUBURN.

For fastest record obtained by a foal of 1892, by The Seer, at Maine State Fair in 1894, \$50, and to any or every colt or filly that shall obtain a record faster than the present state record for yearlings, - - - - - \$100

For the first get of The Seer that shall obtain a record, at the Maine State Fair, equal to The Seer's three-year-old record of 2.29, or his four-year-old race record of 2.22 3-4, or his five-year-old race record of 2.20 1-2, or his six-year-old race record of 2.19 1-2, in a race anywhere, \$200, and for the next three colts that shall obtain records equal to either of these records, in a race, each \$100, the same colt to be eligible to but one premium. These premiums will hold good for the years 1894-5-6.

\$250 to any colt or filly, the get of The Seer, that shall win the yearling colt stakes at the State Fair of 1895, and \$250 additional if the yearling State record is beaten and held for 1895.

FUTURITY SPECIAL, OFFERED IN 1892.

\$250 to any colt or filly, the get of Sidnut, that shall win the yearling colt stakes at the State Fair of 1894, and \$250 additional if the yearling State record is beaten and held for 1894.

BY THE WHITMAN AGRICULTURAL WORKS, AUBURN.

The Whitman Agricultural Works, Auburn Me., offer for the best two acres of Sweet Corn grown in Maine in 1894, planted with "King of the Cornfield" Corn Planter and Fertilizer Distributor, One "King of the Cornfield" Planter, value, - - - - - \$25.00

Upon the following conditions:

A full statement must be made by each contestant to Secretary G. M. Twitchell, Augusta, on or before Nov. 1, 1894, giving quality and condition of soil, kind of seed and method of planting, whether in hills or drills, manner of plowing, cultivating and treating the growing crop, and of harvesting, together with a sworn statement as to the number of ears packed from the same; also will be required a statement from the superintendent of the corn-canning factory canning the same, at the Maine State Fair, 1894. Each competitor must exhibit a trace of corn, not less than twenty-four ears, from the two acres, at the Maine State Fair. The completeness of the statement taken in connection with the yield, to determine the award, which will be made December 1st, by a committee consisting of Col. S. G. Jerrard, Kenduskeag, Hon. W. H. Vinton, Gray, and A. C. T. King, South Paris, to whom all papers will be referred. Individuals intending to compete for this grand prize will please notify the Secretary on or before June 1, 1894.

BY A. L. & E. F. GOSS CO., LEWISTON.

One Ten-Bottle Babcock Milk Test complete, value \$12, to the owner or exhibitor of a cow of any breed, or age, giving the greatest number of pounds of butter fat in one day. Test to be made from milk drawn on the second day of the Fair. Cows to be milked, milk weighed, and samples taken under direction of committee. Test to be made by Babcock method by competent person and in the hall, on morning of third day.

BY UNION STOCK FARM, VASSALBORO.

For best foal of 1894, the get of either of the following named stallions, Embassador, Cedrie, Prince Wilkes, \$25 to 1st; free service, 2d (choice of stallion). \$150 if any colt by either horse named shall win the yearling stakes of 1895, and \$150 additional if the yearling State record is beaten and held for 1895.

BY BARRETT BROS., FAIR VIEW FARM,

Westland, Col. West, and Waveland.

For the fastest record of produce of mares bred to above stallions in 1894, to be trotted at Maine State Fair in 1896 - - - - - \$50.00

To each and every colt or filly that shall obtain, at Maine State Fair, 1894, a record for one, two, three, or four-year olds faster than present State record for same age - - - - - \$100.00

BY A. H. RICE OF WATERTVILLE.

For foals of 1894, sired by Echo - \$10.00
First, \$5.00; second, \$3.00; third \$2.00
For foals of 1894, sired by Oakland - \$10.00
First, \$5.00; second, \$3.00; third, \$2.00.

BY J. S. SANBORN,

PROPRIETOR ELMWOOD FARM, POLAND.

For the best foals of 1893 sired by Gemare, Lothair, or Captain, \$25.00, provided blue ribbon is won at the coming Maine State Fair, season of 1894.

For the best foals of 1894 shown at the Maine State Fair, sired by Gemare, Lothair, or Captain, two or more to enter, \$30.00; the first \$15.00, second \$10.00, and third \$5.00—\$15.00 additional to the winner of the blue ribbon.

The same liberal premiums will be offered for foals of 1895.

BY MAINE CATTLE CLUB JERSEY BREEDERS' ASSOCIATION.

The Directors of the Maine Cattle Club Jersey Breeders' Association offer a diploma for each animal scoring eighty points and over, according to the scale of points adopted by the American Jersey Cattle Club, said animal being recorded in the Herd Register of said Club.

PRATT FOOD CO., PHILADELPHIA, PA.

Offer the following special premiums:

For best pair of Light Brahmas, Langshans, White Wyandottes, Silver Wyandottes, White Plymouth Rocks, S. C. White Leghorns, R. C. Brown Leghorns, Partridge Cochins, Bronze Turkeys, Barred Plymouth Rocks, each, one 5 pound package Pratt's Poultry Food.

BY E. G. EVELETH, TREASURER.

For best exhibit Barred Plymouth Rocks, - - - - - \$3.00

For best pair, - - - - - 2.00

BY AMERICAN AGRICULTURALIST, NEW YORK.

For best exhibit farm products grown by exhibitor, 1 yearly subscription, \$1.50

For best A. J. C. C. heifer calf, six months or over, 1 yearly subscription, - - - - - \$1.50

For heaviest buck lamb, any breed, 1 yearly subscription, - - - - - \$1.50

C. F. COBB, SOUTH VASSALBORO.

Offers a silver cup, valued at \$10, to the A. J. Cattle Club heifer, three years old or younger, bred in Maine, who shall give the largest yield of butter fat, by Babcock test, from milking of Thursday morning, September 6th. Cream to be separated by separator. Test to be made by Secretary of Board of Agriculture.

BY DR. T. N. DRAKE, PITTSFIELD.

To the owner of the first colt by Greenfield, to enter the 2.30 list, free service for one mare to Early Bird, son of Jay Bird, value, - - - - - \$100

For the best foal of 1894, by Early Bird, 2.15 3-4, to be shown at the Maine State Fair, 1894, one-half of service fee for Early Bird, for same dam in 1895, \$50

For the best foal by Bosphorus, 1894, to be shown at the Maine State Fair, 1894, same offer, value, - - - - - \$25

ELMBROOK SPECIALS.

The Elmbrook Syndicate of Belfast offers the following special premiums for the get of their stallion Elmbrook 2.26 1-4 to be competed for at the Maine State Fair for 1895:

For the yearling colt by Elmbrook, making the best time, trot or pace, in colt stakes or in exhibition, one Elmbrook service for 1895.

For the two-year-old Colt by Elmbrook, which shall beat the State record, over any half-mile track in Maine 2 in 3, mile heats, trot or pace, \$50.00.

For three-year-old, same requirements, \$75.00.

THE AMERICAN OXFORD DOWN SHEEP RECORD ASSOCIATION.

Will offer \$50.00 in Special Prizes for Oxford Down lambs, at the Maine State Fair in 1894. The money to be divided into three prizes; 1st, \$25.00 2d, \$15.00; 3d, \$10.00.

Pen to consist of four lambs of either sex, bred and owned by exhibitor in the State of Maine. Lambs to be registered in the American Oxford Down Record, with A. O. D. R. A. ear labels inserted in the ears, and Certificate of Registry under seal of the Association, present at time of exhibition.

BOWKER FERTILIZER CO., BOSTON, MASS.

Offer: For best acre of potatoes grown in Maine, season 1894, on Stockbridge Special Potato Manure, exclusively, one-half ton Stockbridge Special Potato

Fertilizer, value, \$22.50. Provided that with each exhibit, in one-half bushel lots, there shall be rendered a sworn statement of measurement of land, quantity of fertilizer used, kind of soil, manner in treating in 1893, method of cultivation, whither planted in hills or dills, amount and variety of seed used, total yield in bushels, and per cent of marketable potatoes. The completeness of the statement, taken in connection with the quality of sample product, to determine the award, which will be made by the General Agent of the Company the third day of the Fair. Competition invited. Parties intending to compete will please notify Secretary on or before June 2st.

THE AMERICAN SOUTHDOWN BREEDERS' ASSOCIATION.

Will offer the following special premium at Maine State Fair of 1894.

For the "two best recorded lambs" one ram and one ewe—bred and exhibited by a resident of the State; provided, that but one premium will be paid the same exhibitor, four volumes of American Southdown Record. These premiums are offered, conditioned.

I. That the animals competing for said premiums shall be recorded in the American Southdown Record prior to date of entry for the exhibition, and that the party making the entry furnish the secretary of the American Southdown Breeders' Association, at the time of entry, a copy of the same.

II. That the premiums will be paid on presentation of certificate from the proper officer of the fair.

THE DIAMOND CRYSTAL SALT CO., ST. CLAIR, MICH.

Through their state agents, Messrs. Trefethen & Bearce, Portland, offer:

For the package, 10 pounds special entry, butter, scoring the highest number of points, said butter having been salted with Diamond Crystal Salt, exhibited at Maine State Fair, 1894, - - - \$25.00

THE AMERICAN BERKSHIRE ASSOCIATION, CHAS. F. MILLS, SECRETARY, SPRINGFIELD, ILL.

Offer the following special premiums to be competed for at the Maine State Fair of 1894, viz.: The first five or the second five volumes of the record of the American Berkshire Association necessary to complete the set of the successful competitor and valued at five dollars per volume.

For best breeding pen of Berkshires registered in the American Berkshire Record, to consist of a boar and three sows over one year of age, owned by a resident of the state in which the fair is held, the first five or second five volumes of the Berkshire Record, valued at, - - - \$25.00

For best breeding pen of Berkshires registered in the American Berkshire Record, to consist of a boar and three sows under one year of age, owned by a resident of the state in which the fair is held, the first five or second five volumes of the Berkshire Record, valued at, - - - - - \$25.00

CONDITIONS.

I. That the boars and sows competing for the prizes specified above be recorded in the American Berkshire Record prior to date of entry at the fair, and that a list of such entries be sent the secretary of this association.

II. That there shall be not less than two competitors for each of the prizes.

III. That no animals competing for the above prizes be allowed to show for said premiums at more than one State Fair in 1894.

BOWKER FERTILIZER CO., BOSTON, MASS.

Offer the following poultry specials:

For best Light Brahma, Dark Brahma, Partridge Cochins, Buff Cochins, White Cochins, White Dorking, Colored Dorking, S. S. Hamburg, W. F. B. Spanish, S. C. White Leghorn, R. C. White Leghorn, S. C. Br. Leghorn, R. C. Br. Leghorn, Black Leghorn, Dominique Leghorn, Black Java, Barred Plymouth Rock, White Plymouth Rock, Laced Wyandotte, White Wyandotte, Golden Wyandotte, pullets; Bronze Turkey hen, young; Pekin Duck, young; Rouen Duck, young; Aylesbury Duck, young, \$1. each.

Provided that no award shall be made by the expert unless the individual pullet is matured and of sufficient merit to warrant the same. Winners will obtain these awards from the Superintendent of Poultry before leaving the grounds.

Hood's and Only Hood's.

Are you weak and weary, overworked and tired? Hood's Sarsaparilla is just the medicine you need to purify and quicken your blood and to give you appetite and strength. If you decide to take Hood's Sarsaparilla do not be induced to buy any other. Any effort to substitute another remedy is proof of the merit of Hood's.

HORSES' TAILS.

So the legislature of Massachusetts has really passed a law compelling all persons who "dock horses" to cover them with fly netting during the months of June, July, August and September.

Every state should pass such a law. It is astonishing that the officers of the humane society in all the large cities do not have their councils or state legislatures pass such a law.

How cruel and wrong is the docking of horses' tails; sawed off in such a manner that they can do nothing with them. Why, the only defense a poor animal has during the fly season is his tail, which should be allowed to grow its full length without being clipped off to suit fashion's latest fad.

Those men that are sometimes arrested for driving lame animals are not committing half the crime our wealthy citizens are when allowing their fine stock to be shorn of their tail, or the best part of it, which certainly has been provided by the "ever ruling providence" for some good. The council should pass an ordinance punishing any and every one who docks horses or impose a heavy penalty. If this law should be enforced, humanity and civilization will have advanced another step.—*St. Louis Post-Dispatch.*

Bright Spring Days.

The spring should be pre-eminently a season of contentment, happiness and hope. In these bright and pleasant months the country should enjoy its highest degree of tranquility and prosperity. But spring, it is well known, is often a period of discomfort and disturbance in the physical system. Important organs of the body become torpid or irregular in their action, and the fact is instantly reflected in the mental condition of the individual. A disordered liver means disordered nerves and unsteady brain. Anything which will bring the physical system into harmony with budding Nature confers an enormous benefit upon the nation, besides the mere allaying of physical discomfort.

Hood's Sarsaparilla does this, as thousands of grateful and happy men and women can testify, and increased use of this standard spring medicine is of more real practical importance in promoting health and quiet in the business world than reams of abstract theorizing.

There are three stallions owned in New England that are expected to become sensational performers this season. Arion has been a sensational horse ever since he set the two year old record at 2.10 3/4. He has improved each year until he bids fair to wear the stallion crown. The next one on the list is Edgardo 2.13 3/4, by Rumor. This horse trotted as game a race as any horse ever trotted, the day he made his record, as he was as lame as a dog. Still he could have easily gone the mile in 2.12 or better. Geo. Leavitt, who is one of the best posted horsemen in New England, told the writer, a few days ago, that Edgardo was going sound and ought to trot very fast this year. The third one is Col. Thayer's handsome chestnut horse, Ralph Wilkes, who made a record of 2.18 as a two year old. He has been in the stud for two seasons, but a year ago last fall he was given an exhibition mile over Mystic in 2.13 3/4 and finished well within himself. While it is asking a great deal of this great son of Red Wilkes to compete with the others named, there are a number of conservative men who look for Ralph Wilkes to go as fast as any stallion in the country.

Secretary Jewett, of the Breeders' Association, is anxious to arrange a free for all stallion race, with Directum, Arion, Kremlin and any others that care to come in. This would prove a strong drawing card for the New England Breeders' meeting in September next.

FEEDING MANY HOGS AT ONCE.

Funnel Shaped Inclosure, With a Hole For Each Hog's Nose.

Hogs have a certain amount of human longings, ambitions and lamentations about them, inasmuch as they are never satisfied, and if not properly fed they threaten to do even more filibustering than did the members of the United States senate over the silver question. The only successful way to appease their

FUNNEL SHAPED INCLOSURE.

angelic voices is to jam their facial appendages into swill or drive them into grain so deep that their mournful wail is no longer audible in the land of pork and peace. Probably as good a way as any to feed grain to an ordinarily large herd of hogs is to drive them into an inclosure just large enough to accommodate them with comfort. Have the inclosures built so one can drive around all four sides and throw the grain in. In feeding swill or loose grain to a large herd of hogs we noted a novel and successful experiment at a distillery in one of the southern states. Malted grain was fed almost exclusively. A funnel shaped inclosure was built as is shown in this diagram.

Dimensions—Height of fences, four rails; length of closed end, 10 feet; width of entrance, 100 feet; length of sides, 200 feet; capacity, 410 head. The inclosure should be built larger or smaller, as the herd would require. Troughs of 2 inch hard wood plank were constructed upon the ground on the inside of fences. Over the top of troughs and slanting inward were heavy plank with diamond shaped holes, the dots in the illustration representing these holes cut in the plank 12 inches apart. Two hogs could not eat from the same hole at once, for as the hog would root into the trough the hole would be closed.

The feeders drove a team and swill wagon around the inclosure with the feed and threw it in over a slanting plank, as in any ordinary trough, the eating plank being raised above the feeding plank. By this method no feed is wasted. This inclosure takes more room than many ordinary ways, but there is considerable saving in feed. By making the inclosure funnel shaped the hogs are easily driven in. This inclosure also answers the purpose for feeding corn in the ear. Stout slats a foot apart may be nailed across the feed trough and used in place of the boards containing the diamond shaped holes. Care should be used in distributing the food at regular intervals in the troughs so that each hog would get its proper share.

—J. Ward Diehl in Field and Farm.

Tamworth Hog.

Comparatively little known in the United States is the Tamworth breed of hogs. It is a breed for the curers of bacon, being mostly all sides and no quarters. Mr. Thomas Wright, an Englishman, says that the cross of Berkshire with the Tamworth produces the most

TAMWORTH BOAR.

profitable bacon hogs in the kingdom. The Tamworth matures late, and the cross with the Berkshire serves to correct this defect.

The Tamworth is a red or red and black hog. It ought to have a "gamv"

flavor, for in appearance it resembles more the ancient wild boar or the almost equally wild Tennessee razorback than any modern hog. It is very hardy and is popular in Canada. Some of the breed drew prizes at the World's fair. While the Tamworth is nearly all bacon it does not fatten rapidly. It is good, therefore, for lean bacon. But it is not likely ever to be regarded with much favor on this side the line. It is classed as a faraway cousin of the Berkshire.

SADDLE HORSE CLASSIFICATION.

The World's Fair Display of Gaited Animals Evolved It.

After witnessing the magnificent exhibit of the gaited saddle horses at the Columbian exposition in August and September last Chief Buchanan was very anxious to have the exhibitors return their horses as a special feature of the postponed show of thoroughbred and trotting bred horses, which was held a few weeks later, and with that end in view he requested General John B. Castleman to prepare a suitable classification. This request afforded the president of the National Saddle Horse Breeders' association an opportunity to set forth in tangible form his clearly defined ideas of the utility of the gaited horse under the saddle and also in harness. It is the pride of the breeders of this class of horses that they admirably answer both purposes, for a well bred, thoroughly broken saddler will use his gaited horse under saddle and when put in harness will hold strictly to a trot, and as he is fitted in form and finish for harness purposes he becomes a most valuable "combination" horse. A classification with prizes was prepared and submitted to Chief Buchanan, and only the lack of funds prevented its adoption. We take pleasure in printing it and commending it to fair managers the country over as worthy of incorporation in their premium lists, suiting the amount of prize money, of course, to their several abilities:

SADDLE HORSES TO BE EXHIBITED UNDER SADDLE.

SADDLE AND HARNESS, TO BE RIDDEN FIRST AND THEN DRIVEN.

	\$200	\$125	\$75
Stallion any age.....	200	125	75
Mare any age.....	200	125	75
Gelding any age.....	200	125	75

COMBINED SADDLE AND HARNESS MATCHED TEAMS.
Mares or geldings to be owned and used as a team at time of entry by exhibitor; to be ridden first and then driven as team of light harnessed horses.....\$200 \$125 \$75

We remember when a boy of being forbidden to ride the family horses because it would "spoil" them for driving purposes. It is high time that such an idea should be shelved, if indeed it anywhere exists at this day. A gaited horse trots when he is made to trot, racks when he gets the signal and canters when put to that pace. He knows all his gaits thoroughly, and he knows as well as his driver that the trot is the gait required in shafts or at the pole. The adoption of the classification suggested will materially assist in the development of a class of horses of the highest possible utility in the city and on the farm.—Breeder's Gazette.

Cheviot Mutton Sheep.

That the Cheviot will ever play an extensive part in the history of American mutton sheep I scarcely think probable, as we have not the same conditions here that they so eminently subscribe to in Scotland. Winter feeding must here ever be taken into account, and when subjected to confinement I do not think they will submit to such ignominious treatment as readily as some other varieties, but for a hardy sheep, capable of working all day for a living, even having to walk long distances to accomplish it and in connection therewith producing a capital coat of soft wool and producing a carcass which, if not equal to the Welsh, is still far ahead of the heavier long wools—for the mountains of Virginia or plains of Tennessee they would appear to be admirably adapted.—R. Gibson in Breeder's Gazette.

A FRUIT TREE PROTECTOR.

An Expired Patent For Circumventing Creeping Insect Pests and Other Vermin.

Numbered among expired patents now the property of any one who desires to adopt the same is a fruit tree protector that is easily and cheaply made.

The device can be made of any flexible sheet metal, preferably tin, and is so cut and formed that when applied to a tree it resembles the frustum of a cone, as at B, Fig. 1. It is held in place by an elastic band (C) which passes over hooks or projections on its opposite ends and draws them together, making it fit snugly

AN EFFECTIVE TREE PROTECTOR.

around the tree. If the tree should be uneven or have cavities in its bark, the clamping edge of the protector can be forced or bent into them, so that a correct fit is made.

These protectors are made at a very light cost and can be of the largest size by seaming together several pieces of tin. The lower edge can be turned up slightly to hold some repulsive compound or liquid, as shown in Fig. 2 (b), but this is not necessary for protection against the canker worm, for which the device is mainly intended to be used.

Hardy Rhododendrons.

Hardy rhododendrons are among the finest of the broad leaved evergreen shrubs, the wild rhododendron growing luxuriantly in a soil composed largely of decayed leaves, or leaf mold, which contains an abundance of plant food for all kinds of vegetable life and holds moisture. It is therefore a good plan when practicable to add leaf mold to the soil. What the rhododendron needs most is moisture at the roots and a soil of extreme fineness that will not bake, and leaf mold is helpful here, even mechanically. Given these simple conditions, the rhododendron will almost take care of itself, and the many difficulties with which it has been hedged around will disappear. It is generally supposed that the rhododendron is very difficult to transplant. As a matter of fact, however, it is very easily transplanted if properly lifted, and at almost any time except when making a new growth, though it may need to be thoroughly watered in dry weather. Its great mass of fibrous roots holds the soil together so well that it is easily lifted with a firm ball of earth and may be safely carried hundreds of miles when properly packed in damp moss. This splendid shrub may be grown singly or in masses.

The Spray Calendar.

The Cornell experiment station has issued a spray calendar which contains much matter of general interest, in instance of which are the following concise directions:

For plant lice use kerosene emulsion on all plants.

For rots, molds, mildews and all fungous diseases use either the bordeaux mixture or ammoniacal copper carbonate.

For all insects which chew, paris green and bordeaux can be applied together with perfect safety. London purple is also used, except on peach and plum trees, for insects which chew, but as it is more caustic it should be applied with lime or the bordeaux mixture. Hellebore is also employed for insects which chew.

Kerosene emulsion is recommended for insects which suck, cabbage worms and all insects which have soft bodies.

Black knot on plums and cherries should be cut out and burned as soon as discovered.

ALL ABOUT CEDAR TREES.

There Are Only Three Kinds In the World, So Far as Is Known.

There are the cedar of Lebanon, the Deodar cedar and the Mount Atlas cedar. These, says the editor of Gardening, are the only kinds known, and although generally rated as distinct species their botanical relationship is so close that Sir Joseph Hooker considers them only three varieties of one species. All three are in cultivation here. The Mount Atlas cedar is the hardest, the cedar of Lebanon next and the Deodar the most tender. Indeed the last named is barely hardy north of Philadelphia.

Of all three there are both glaucous blue and plain green leaved forms, wild in their mountain homes, as well as cultivated in gardens.

What we call red cedar in the east is only a juniper (J. Virginiana), the red

THE BLUE MOUNTAIN ATLAS CEDAR.

cedar of the Pacific is *Thuya gigantea*, the white cedar is the common arborvitae, the Lawson cypress is also called white cedar, and there are some others, but none of them is a true cedar (*Cedrus*).

You can buy a Norway spruce for 25 or 50 cents, but the Blue Mount Atlas cedar will cost you six times as much. Now, which would you rather have? A specimen of this blue cedar on your lawn would be something to be proud of, something everybody hasn't got. It would be an object of decided beauty and a permanent pleasure, and it would fix the attention of everybody on the street. Growing such beautiful trees as these is not only satisfaction to yourselves, but practical missionary work in your town and an object lesson to your neighbors.

Why Stone Heaps Kill Trees.

The commonly observed fact that a pile of stones around a tree is sure death to it is thus explained by American Cultivator: There are a variety of causes. Stone heaps make a harbor for mice, which burrow in the loose soil under the heap and bark the trees under shelter of the stones. Apple and pear trees are often destroyed thus—in fact, nearly all kinds of trees when surrounded by stone heaps are sure to be more or less denuded of their bark. But a pile of stones around an oak or a butternut is usually fatal to it if kept two or three years, though the bark of these trees is never eaten by mice. The reason in this case is that the stones make a mulch around the trees, encouraging the growth of roots in warm weather close to the surface of the ground, but in winter the stone heap is no protection against deep freezing, and the destruction of the tender, succulent roots of the tree near the surface seriously injures it. The repetition of this process three or four years in succession usually finishes the tree.

When to Plant Raspberries.

American Cultivator says: Black cap raspberries should be planted in the spring, as then the plants grow best. They should not be planted deep, or they die. The red raspberries and blackberries may be planted in spring or autumn as is most convenient. All weeds should be kept down among the young plants. All suckers springing up, unless desired for planting, should be treated as weeds. Plantations of raspberries should be renewed every six or seven years, the old plants seeming to lose vigor by that time. The black raspberries root at the tip and form new plants, while the red ones form numerous suckers, which spread the plant.

JAY-EYE-SEE 2:10

Mr. J. I. CASE, (Hickory Grove Farm, home of Jay-Eye-See) Racine, Wis., says: "After trying every known remedy, I removed a large Bunch of two years standing, from a 3 year old filly, with three applications of

RED IMP is a good representative of the Wilkes family, and combines about as many good qualities as can be found in a single individual. He is of good size; standing 15-3 hands high, good feet and legs, and weighs 1100, intelligent head, and a disposition of the very best. His gait is all that could be desired, perfectly pure and frictionless. He has already give evidence of his ability to go into the 2.30 list. His first and only foals show a high degree of quality, finish, and action, stamping him a grand young horse. His choice breeding, size, finish, speed and perfect action commend him as a Stock Horse. RED IMP will be in the hands of

N. R. BROWN, BLACKSMITH,

MECHANICS' ROW, AUBURN, ME.

Terms \$10. to warrant. Mares disposed of will be considered in foal.

AMERICAN ROSES.

An Englishman on American Methods. Why Not Grow Roses From Seed?

Sometimes we may profit by even a sharp criticism, and an English critic expresses surprise that with an apparent love of roses, which pervades the American people and which leads them to buy them by the hundreds of thousands and very often at a high price, very few attempts have been made by American florists to improve the rose. They have not the patience in carefully crossing which a number of the old world rose-growers exhibit—no attempt of any account is made to raise seedlings—and the critic calls close attention to the fact that all the so called American roses that are popular were merely chance sports. He refers to the varieties known as Marshall P. Wilder, the Bride, Sunset, the Puritan, the Waban and the Queen.

A little fun is made of Americans about the American Beauty, which is not an American rose, but then, as Thomas Meehan tells in his last Monthly, Americans have never claimed this. It was called American Beauty simply because the original name was lost, and no one knew what its real name was. It was ultimately found to be a European variety known as Mme. Ferdinand Jamin. This is conceded by American rosegrowers themselves, and they are perfectly willing that the credit should go to where the credit is due. Still the point is a good one, and American rose-growers might possibly turn their attention to the growing of roses from seed, according to the authority quoted, who says:

The standard of excellence in America is very different from that which prevails in the old world. The American rosegrower does not simply want a large showy flower with some peculiar tint or shade of color—he wants a flower with a long stem that can be cut to advantage without having to fasten an artificial stalk to it—and he wants a variety that will bloom freely and in continual succession as well. These points have never been a want in the old world, and American needs should bring American results.

Growth of Trees.

A correspondent of The American Cultivator wanted to know if a mark or wound made on the stem of a tree would remain at the same distance from the ground during succeeding years or would become elevated as the tree increases in height. Here is the reply made: The wound remains just in the position where first made, for the simple reason that tree stems do not stretch growing, but elongate by addition to terminal branches and layers of new wood deposited around and over the preceding seasons' layers all the way from the tips of the highest branches to the very ends of the roots in the ground.

If you will bear in mind that the inner or heart wood of a tree is dead material, decay being prevented because it is hermetically sealed within layers of live sap wood, you can readily understand why a spike driven into the stem can neither rise nor fall, but may in time become covered with the annual layers of new wood. If you measure the height from the top of some large root, then your mark will appear to get lower, simply because the new layers of wood formed over the root increase its diameter.

The experiments of Dr. J. F. Smith of the department at Washington, as published in some of the journals, do not furnish any encouragement for success. He had applied to hundreds of trees potash, phosphoric acid, lime, nitrogen in various forms, muriate of potash, bone black, bone ash, nitrate of soda, sulphate of ammonia, ashes, tobacco dust and barn manure. Some of the orchards were entirely healthy, and others had the yellows. On none of these had they any effect in preventing or curing the yellows. Of 645 affected with it, none recovered. A few slightly improved. The symptoms of the disease, as premature ripening of the fruit, branched shoots and premature unfolding of winter buds, did not disappear from any of them. It appears from this report that we must look for relief to some other remedy than applying compounds to the trees. So far the only efficient cure is the removal of the affected trees by the roots.

CUT THIS OUT

ACHILLES.

Standard Bred
Trotting Stallion,
NO. 22,408.

RECORD—2.35½ at five years old.
Trial record on half-mile track, 2.27.
ACHILLES is a beautiful bay, standing 16 hands high.

SIRE—Carenaught, No. 9603, by Fearnaught, No. 132; record, 2.24½. (In his time the fastest stallion in the world; last half mile in 1.07 from a standing start.) Dam of Carenaught, Lady Richmond, record, 2.21 (on ice), by Cadmus, by American Eclipse; Achilles dam, Old C. M. Clay; also dam of Manchester.

Archilles is the sire of Themis, record 2.25; Blanch R., record, 2.28 1-2, Marchoness, record, 2.32 1-2, and three others out of his ten first foals that can beat 2.30.

Achilles gets size, style and beauty; just what there is a great demand for to-day. It is believed by some of the best judges that he will get as much speed as any horse standing in Maine.

In order to introduce this horse to the public, I have fixed his services at the remarkably low price of \$15 TO WARRANT.

Will make the season of 1894 at

D. M. ALLEN'S
Jay Bridge, Maine.
AL. DUDLEY 968

RECORD 2.34 1-4.

Sire Mambrino Dudley, record 2.19¾, sire of Cresendo 2.24, Tracy 2.26½, Gretina 2.27¼, Rintoul 2.28¾, Rinaldo 2.28¾, Almont Dudley, (at 2) 2.33½, Al. Dudley 2.34¼, Mambrino Dudley by Woodford Mambrino 2.21½, sire of 12 in 2.30 list, by Mambrino Chief 11, sire of 6 in 2.30 list. Al. Dudley's first dam Lady Almont by Almont, second dam by Brown Chief 4445, sire of Maggie K. 2.29 1-4, and sire of the dams of four in the list.

Al. Dudley is a beautiful seal brown stallion, 15¾ hands high, weighs 1100 pounds, foaled in 1880. He is a horse of great intelligence and perfect disposition. His record is no measure of his speed, as we hope to prove this season. His colts are large, of good style, and good gaited. Al. Dudley will make the season at \$15, to warrant; \$10 by the season. For further particulars address

SUTTON STOCK FARM, Orono, Me.

J. FRANK DAVIS, Manager and Trainer. Horses handled for speed or road.

SEASON OF 1894 SIR BYRON P.

Is one of the handsomest, and most stylish Stallions living, Bred by Byron Porter, of Stillwater, Me.

SIRE, Bayard of Houghton farm, imported from France.

DAM, Percheron and Clyde.

I purchased the above Stallion when one year old expressly for stock purposes believing him to be just such a horse as farmers and all breeders of draft and business horses ought to use, and have put his service fee within reach of all. In my opinion no better horse stands in Maine. He is very trappy gaited, a very fast walker, has fine action, and can road as easily as most horses of one thousands pounds. He has the best of limbs and feet, is very finely made in every point, and has perfect disposition.

I shall be pleased to show him to all who may call at my stable, and feel confident that no one will say that I have said enough in his praise.

SIR BYRON P. is a beautiful Iron Gray 5 years old, 17 hands and weighs 1635 pounds. He will make the season at my stable on Bennoch road, leading from Stillwater to Pushaw, except Monday and Tuesday of each week, commencing May 7th, at Frank Miller's Stable in Greenfield.

TERMS TO WARRANT, \$10.00.

Accidents at owners risk. Colts holden for service. Service fee payable when mare proves with foal. \$5.00 single service. Cash at time of service.

TO BREEDERS OF THOROUGHbred STOCK. THE MCFADDEN PEDIGREE BOOK IS INDISPENSIBLE.

The increasing interest in the breeding of fine stock, and difficulty heretofore experienced in tracing the pedigree of breeding animals, has shown the necessity of some compact and simple form of record to be used by all who engage in the rearing of good stock, to the end that an authentic record may always be found in the hands of the breeder that will establish beyond a reasonable doubt the breeding of the animal whose pedigree is sought.

This simple device has been published in book form, each book containing blanks for 100 pedigrees. Upon the birth or purchase of an animal, its pedigree should be at once traced and entered on one of the blank forms as fully as may be ascertained, and on opposite page, under the head of MEMORANDA, enter color and full description of the animal.

As the Memoranda may be added to as occasion may require, you will have a complete history, as far as possible, of each animal in your possession which will always be at hand for reference. Of course the form may be used for cattle, sheep, swine, etc., as well as for horses. This book, neatly bound in cloth, and containing the new standard rules for breeding horses, will be mailed, postage prepaid, to any part of the United States or Canada, upon receipt of one dollar, by

The Turf Publishing Company,
Auburn, Me.

THE above cut is an exact reproduction of the cover design of the PORTFOLIO BINDERS which we are now offering to our readers. They are made of the Best English Silk Cloth, handsomely bound and embossed in black, blue, and gold, the design being artistic and attractive, making a handsome

"G. M." REMEDIES

THE GREATEST RESULTS EVER KNOWN.

IT IS THE OLD, OLD STORY,

"THE ONE HALF NEVER WAS TOLD."

An Ounce of Preventive is Worth More

Than a Pound of Cure.

E. A. BUCK, proprietor of Black Hawk Wilkes Bangor, has a word to say in regard to "G.M. Remedies,

BANGOR, Dec. 28, 1891.

GEO. M. FOGG,

Dear Sir—In answer to your request, I state that my stallion Black Hawk Wilkes was in poor flesh and we found it impossible to improve his condition. His coat was rough and his food came from him in an indigested state. The stablemen obtained a box of your horse powders and commenced giving it to him. In ten weeks he gained over 100 pounds. He expelled over fifty intestinal worms, from eight to twelve inches in length, that we know of, and probably a great many more. I consider them an invaluable remedy.

Yours respectfully, E. A. BUCK.

C. A. PARTRIDGE,
VETERINARY SURGEON.

Treats all diseases of domestic animals. Special attention to all operations and treatment of all kinds of lameness, Colts and Stallions castrated by most improved method, at \$2 for colts and \$5 for aged horses, when there are 5 or more at one place, and traveling expenses and guarantee as good a job as anyone can do. Have castrated 6 years and never lost one.

Orders by mail, telephone or telegraph will receive prompt attention. Office at A. D. Horn's Livery Stable, Farmington, Maine.

Horses at Auction

I wish to call the attention of horsemen to the fact that I am the first man to open a stable for the weekly sale of horses at auction in the State of Maine, and have conducted it successfully for two years without interruption.

I HANDLE ALL CLASSES,

Workers, Gentlemen's Drivers & Trotters.

I guarantee every horse sold to be just as represented; if not, return him and get your money. If you have a horse for sale, write me a description of him, or call and see me.

Auction Sales Every Saturday,

AT 10.30 A. M., AT

Windsor House Stables,

BANGOR, MAINE.

35 Complete Novels

NEATLY BOUND,

and a Year's Subscription

to a large 16-page illustrated monthly magazine for **ONLY 30 CENTS**. This is a most liberal offer as **HOUSEHOLD TOPICS**, the magazine referred to, is a high-class paper, replete with stories of love, adventure, travel, and short interesting and instructive sketches of fact and fancy; and in the list of 35 novels are such treasures as "A Brave Coward," by Robert Louis Stevenson; "Blacksmith's Daughter," by Etta W. Pierce; "Ninetta," a most pleasing story by M. T. Calder; "A Gilded Sin" and "Between Two Sins," by the author of "Dora Thorn;" "The Truth of It," by the popular writer, Hugh Conway; and the "Moorehouse Tragedy," rather sensational, by Mrs. Jane C. Austin; "A Heroine," a delightful story by Mrs. Rebecca H. Davis; "Wall Flowers," by the popular Marion Harland, and the great story "Guilty or Not Guilty," by Amanda M. Douglass. Space forbids mentioning the other novels; but they are all the same high grade, popular, bright, romantic, spicy, interesting stories.

The 35 novels and the current issue of **HOUSEHOLD TOPICS** will be sent you the day your order is received. This will supply you with a season's reading for a mere song; and will be appreciated by all in the household. Send at once 30 cents to **HOUSEHOLD TOPICS PUB. CO.**, P. O. Box 1159, New York City, N. Y.

Valuable Presents Free.

We wish to introduce our System Pills into every home. We know that we manufacture the very best remedy on earth for the cure of Constipation, Biliousness, Sick Headache, Kidney Troubles, Torpid Liver, etc.; and that when you have tried these pills you will gladly recommend them to others, or take an agency, and in this way we shall have a large, well-paying demand created.

As a special inducement for every reader of this paper to try these pills and take an agency at once, we will give to each person who sends twenty-five cents in cash, or thirty cents in stamps, for a box of System Pills, one of the following presents: A Handsome Gold Watch, a good Silver Watch, a Valuable Town Lot, a Genuine Diamond Ring, a Casket of Silverware, or a Genuine \$5.00 Gold Piece. Every purchaser gets one of the above presents. There are no exceptions. Shaw Remedy Co., Rutherford, N. J.

3d. dam (on sire's side) Kate by Alexander's Pilot Jr.

It will be seen at a glance that **HARBINGER** abundantly inherits the richest of trotting blood ancestry, that which stays until the race is finished. **HARBINGER** will make the season of 1894 at my stable on Main Street, Pittsfield, Maine at the low price of \$25 to warrant a live g foal. Payment at first service, mares to pasture 75 cts. per week. Stable hay and grain (\$2.00) per week. All accidents at the risk of owners of mares.

HARBINGER'S LIST.

Van Helmont,	2.19½	Prince Harbinger	2.32½
Hallie	2.23½	Diana	2.34½
Silver bill	2.25¼	Molly Baum	2.35
St. Ives	2.29½	Fastrada	2.36
Harebell	2.30¼	Camile	2.36½
Davidson	2.31	Silver King	2.37
Ansel W.	2.31	Carlotta	2.38½
George H.	2.38¾	Ned H. (2 yrs.)	2.53

BIRCH GROVE FARM

Standard Stallions For 1894.

1. **CONSTELLATION**, sire of Patrol 2.14½, Glenarm 2.23½, Junior 2.27½, Mahomet 2.27½, Illusion 2.24, Independence 2.30. Terms \$15 by the season or \$25 to insure.

2. **TIDEMARK**, by Victor Von Bismark, dam by Twilight by Hambletonian 10. \$15 and \$25.

3. **GAME BIRD**, by Jay Bird by Geo. Wilkes dam by Honest Allen. \$10 and \$20.

4. **CHOICE BIRD**, by Eagle Bird 2.21, by Jay Bird by Geo. Wilkes. First dam, Valor, daughter of the King, son of George Wilkes; \$25 to insure.

5. **LANCING**, by Electrotyp son of Electioneer, dam Macbeth (dam of Lakewood Prince 2.13½) by Woodford Mambrino. \$10 and \$20.

6. **PLEIADES**, by Constellation dam by Emperor William 2.27½. \$5 and 10.

These horses are all bred in the purple. Best of all they are good individuals and stand this season at hard times prices. Special attention is called to Constellation the premier of the stud. His specialty is the getting of extreme speed out of common bred mares.

For Description and Extended Pedigree Address,

THE MECCA LINIMENT.

TO THE MECCA LINIMENT CO.,
Malden, Mass.

Gentlemen:—One week ago today a pair of young horses broke away from me while hitching them, and ran into a barbed wire fence, and taking post and all, cut them terribly. The next morning one of them could hardly get out of the stall. I put Mecca Liniment right on and have used it freely ever since. The wounds are practically healed already, so that today I drove both horses as usual. For man and beast Mecca Liniment is the best in the world. Please send me a dozen bottles by express right off.

Yours truly,

(Signed) **AUSTIN BECKWITH.**

New Hartford, Conn., Dec. 15, 1893.

WE CHALLENGE THE WORLD

"The King of the Cornfield."

CORN PLANTER AND FERTILIZER DISTRIBUTOR.

Plants Corn, Beans, Peas, Beet and Other like Size Seed, together with any Kind of Fertilizer, Wet or Dry.

The Fertilizer drops at the same instant separately and to the right and left of the seed and mixes with the soil, thus avoiding all danger of injury to the seed. The machine will drop any desired quantity of seed or fertilizer at a time at equal and various distances apart in hills, checks or drills. The feature of dividing the fer-

tilizer and mixing it with the soil is not embodied in any other machine. One man with one horse can plant from seven to ten acres in a day. Pat. June 18, 1889.

SEND FOR DESCRIPTIVE CIRCULARS AND TESTIMONIALS.

Many improvements for 1894 have been made. The Fertilizer Register added this season will adjust the amount of Fertilizers used from 20 lbs to 700 lbs to acre. Has a gauge indicating the number of hundred pounds required. Also new Steel Coverers with Tension Spring, adjustable to keep the same in place. Also many other improvements. We offer one of the above Corn Planters as a special Premium for the Best Two Acres of Sweet Corn grown in Maine season of 1894. See Maine State Fair Premium list 1894 for conditions and so forth or get to us for a copy. Competition invited.

Maine State College Agricultural Department, }
ORONO, MAINE, Dec. 12, 1892. }

The Whitman Agricultural Works—Gentleman: The "King of the Cornfield" planter was given tests with a variety of seeds, and also used in planting our experimental fields of corn for silage. The performance of the machine was of a very high order. Its uniformity of seeding and depth of planting, its range of adjustment to different quantities of seed, Fertilizer and distance of distribution, and the thoroughness of its construction are guarantees of its value. Respectfully,

G. W. GOWELL, Farm Supt. and Instructor in Agriculture.

Office 89 State Street, P. O. Box 2557 Boston, Mass.

THE STALLION
ROBINSON D.

Race Record 2.17 3-4.

WILL MAKE THE SEASON OF 1894

AT THE STABLE OF HIS OWNER,

ROBINSON DEAN,
BUCKFIELD, ME.

ROBINSON D. is a brown-bay horse, with narrow white stripe in the face and two white ankles on the near side. He was foaled in 1881, stands 15 $\frac{3}{4}$ hands high, and is a well proportioned horse all over. He was got by Daniel Boone, son of Hambletonian 10 and Old Kate, hence a full brother to the famous Bruno-Brunette family. The dam of Robinson D. was by Cobb's Young Brandywine which came from Canada in 1853. This mare was not fashionably bred, but she was more than that—she was a producer of speed by any horse to which she was bred.

In 1890 Robinson D. was campaigned and won at Syracuse, Auburn, Oswego and Phoenix, N. Y., winning six races without losing a heat and a record of 2.26 $\frac{1}{4}$, all on half mile tracks.

In 1891 Robinson D. started in five races, winning every one in straight heats, and lowering his record to 2.23 $\frac{3}{4}$ at the New England Breeders' Meeting at Mystic. His next start was at Rigby Park, Portland, in October last, when in a field of 16 starters, he won in 2.19, 2.17 $\frac{3}{4}$, 2.18 $\frac{1}{4}$, and could have gone in 2.15.

It now looks as though, successful as Robinson D. has been as a trotter, that he will be a still greater success as a sire, for he has to his credit Black Nathan (2.26 1-4), Nellie D. (2.27), Belle D. (2.28 3-4), Belle Chase (2.23 1-4), Etta Boone (2.27 1-4), and Evelyn (2.29 1-2) all from a class of mares which would be by no means considered as fashionably bred.

Robinson D.'s colts all show more or less speed, and there are hardly any of his get that cannot show from 3.00 to 2.40 without training.

TERMS, TO WARRANT, \$50.

Mares boarded at reasonable rates.

ROBINSON DEAN, BUCKFIELD, ME.

1894 - - - SEASON OF - - - 1894

2.174 - ALBRINO, 3052, - 2.174

CHESTNUT HORSE, 16 HANDS.

By Almont 33, dam by C. M. Clay Jr. 22, sire of Iona S. 2.17 $\frac{1}{4}$, Fauntleroy, trial 2.18 $\frac{1}{4}$, Albrina 2.27, Audubon 3, 2.53 to wagon, Albrina 2 years, 2.42 $\frac{1}{4}$, Odd Fellow, one year old 1.32, half mile, also sire of Elsmere which got Eldora, mile in 2.30 last season at 3 years, Almont sire of Westmont 2.13 $\frac{1}{4}$, 2.01 $\frac{1}{4}$ with running mate, Fanny Witherspoon 2.16 $\frac{1}{4}$, Piepmont 2.17 $\frac{1}{4}$, and 34 others; dams of Winslow Wilkes 2.09 $\frac{1}{4}$, Alabaster 2.15 and 72 others. His sons have sired such as Flying Jib 2.04 and dam of Fantasy (3) 2.08 $\frac{1}{4}$.

Dam of Albrino Maggie Bryan by C. M. Clay Jr. 22, sire of four in 2.30, and dams of 34 in the 2.30 list. Second dam Belle Bryan, full sister to Patchen Mambrino, sire of the game campaigner Walter E. 2.10 by Mambrino Patchen. Third dam Old Den, granddam of Wild Rake 2.22 $\frac{1}{4}$, McLeod 2.21 $\frac{1}{4}$, and Eric 2.28 $\frac{1}{4}$, by Gaine's Denmark son of Imported Hedgeford.

Albrino is a horse of fine presence, large sized and possessed of great style and finish. His get have the same qualities, are excellent roadsters and as will be seen are proving fast.

Terms, \$25.00 to Warrant.

H. G. PARSHLEY,

Dexter, Maine.

"BREED TO A PRODUCER."
WOODBRIÑO

3296. 2.25 1-2.

FRANK W. BURRILL, Belfast, Me. or GEORGE D. OTIS, 173 State Street, Boston, Mass.

We hear, a few days since, of a gentleman who took an extended and very expensive trip abroad. Among other places he visited London. When he returned home a friend asked him if he saw the Houses of Parliament. "No," he replied, "I did not. I was in London a week and the fog was so thick that I saw nothing during the whole time but my hotel and the railroad station."

WHEN HE GOT HOME.

However, he saw it all, for he was a subscriber of the TURF, FARM AND HOME and had saved his coupons. Sattered through the twenty portfolios comprising **Sights and Scenes of the World** he found twenty-one magnificent views of the most noted and characteristic sights of London, and he found also scores of other interesting scenes and places which he failed to see while he was the spot.

The coupons for the third part are appearing regularly now. If you did not get last week's coupon, look up the back numbers of this paper and secure it before it is too late.

WE WILL REPEAT

Once more the terms of our great proposition. You have, of course, heard of that great work entitled **Sights and Scenes of the World**. It consists of 320 marvelous photographic views, each 11x13 inches. This is divided into 20 parts, each containing 16 views neatly and durably bound. They will be delivered to you at the office of this paper or sent to your address by mail, securely protected in a pasteboard tube. What you have to do is this: Clip a coupon from this paper. Bring or send them to the Coupon Department of the TURF, FARM AND HOME together with five two cent stamps (the bare expense of packing and mailing), and receive in return the part your coupon calls for. Each week's coupon will call for a different part until all are issued. If you want two parts instead of one, two coupons of different numbers and ten two cent stamps.

REGARDING THIS SUMPTUOUS WORK

It is not necessary to say more. If you have not seen it ask those of your neighbors who have received the first part. They will tell you that it is artistic beyond doubt, the descriptions interesting and instructive, the views exceedingly well chosen, the idea most attractive and original. In fact,

IT IS GREAT.**SOUTH PARIS SALE AND LIVERY STABLE.**

What Maine People Say

WHO HAVE USED

DR. SANDEN'S

WONDERFUL

Electric Belts.

CURED

After Everything Else Failed.

Will cure without medicine all Weakness resulting from over-taxation of nerve forces; excesses or indiscretion, as nervous debility, sleeplessness, languor, rheumatism, kidney, liver and bladder complaints, lame back, lumbago, sciatica, all female complaints, general ill health, etc. This electric Belt contains Wonderful Improvements over all others. Current is instantly felt by wearer or we forfeit \$5,000.00, and will cure all of the above diseases or no pay. Thousands have been cured by this marvelous invention after all other remedies failed, and we give hundreds of testimonials in this and every other state.

Our Powerful Improved ELECTRIC SUSPENSORY, the greatest boon ever offered weak men, FREE with all Belts. Health and Vigorous Strength GUARANTEED in 60 to 90 days. Send for Illus'd Pamphlet, mailed, sealed, free, to

DR. A. T. SANDEN, Inventor.

826 Broadway, New York City.

A Wonderful Cure From Maine.

THORNDIKE, STA., ME., Jan. 3 '94.

DR. A. T. SANDEN,
Dear Sir:—I want to give for publication my testimony, which I want all of my friends and everybody who are suffering as I was, to read. I will as briefly as possible state my case to you.

Four years ago I had LaGrippe. It left me with a bad kidney trouble and weak back, also diarrhea. A year ago last September I was taken with nervous dyspepsia. I was so nervous I could not sleep nights. I tried many kinds of medicine which only afforded temporary relief. Last June my feet and legs began to swell. They were swollen to nearly twice their natural size. I was also swollen bad across my kidneys and liver. I could not lie down, and was so weak I could scarcely walk across the room. I was examined and treated by some of the most skillful physicians. They pronounced it dropsy and failed to help me. I had about given up all hopes of getting help, when I chanced to read of your Electric Belts. I concluded to try one as a last resort, but I had grave doubts of its doing good in my case, for I was given up to die by friends and neighbors. I purchased one of your No. 6 Belts July 12th, and I can truly say it saved my life. In less than forty-eight hours after wearing the belt the swelling had left my kidneys, and in one week my feet and legs were nearly back to their natural size. In three weeks I could eat anything my appetite craved, and could sleep like a child. I am not nervous and consider myself better than I have been for years. Electricity started the circulation that medicine failed to reach. My wife has worn my belt and it has entirely cured her of chronic constipation and female weakness, for which she has doctored for years. We cannot say enough in praise of your wonderful belt. I advise all suffering humanity to purchase one of Dr. Sanden's Electric Belts.

Very gratefully yours,

I. R. BLETHEN,

Box 41 Thorndike Sta., Waldo Co., Maine.

Sciatica and Lame Back Cured.

MONSON, ME., Feb. 29, '93.

DR. A. T. SANDEN,
My Dear Sir:—In April, 1891, I was attacked with a severe case of sciatica, which confined me to the house. Your agent, C. W. Morrill, called to see me. He very generously offered to let me try one of your Electric Belts. I put it on and found relief. I had so much faith in it I ordered one at once. Whenever I feel any weakness I use the Belt, which helps me very much; it also removes any pains from my back. I can cheerfully recommend it as being the best pain eradicator I ever used.

Yours sincerely,

E. R. HAYNES,

Monson Maine.

Catarrh and General Debility Cured.

EASTPORT, MAINE, Feb'y 24, '94.

DR. A. T. SANDEN,
Dear Sir:—I send these lines to let you know what your belt has done for me and you may use them for the information of other sufferers. It is almost impossible to believe what wonders your belt has wrought in me, but it is a living truth, and I wish all sufferers could be convinced what a power for good there is in your invention. I got the No. 5 belt on the 17th of October last and put it on that same evening and have worn it 3 to 4 hours every evening since. In a few days all the aches and pains I had all over left me, even that dreadful pain in my stomach was gone and my bowels acted regularly. Now my Nerves are steady and appetite is good and I get perfect refreshing sleep without those awful dreams. When I got your belt my breast was all broke out with sores and had been for some time. These are all healed and the catarrh which had troubled me so long is also gone. I let two of my friends try the belt a few times and it did them so much good they will soon order from you. I would not take \$1,000 for mine if I could not get another. If people only knew what your belt is they would not fool away their money and time on these many humbugs because they are cheap. Considering what your belt is and does it is the cheapest in the world, and I wish all sufferers knew what I know about it.

Yours truly, THOMAS HENDERSON,

Eastport, Washington Co., Maine.

Lame Back and Side Cured.

MONSON, ME., March 1.

DR. A. T. SANDEN,
Dear Sir:—I feel as if I ought to say a few words about the great good your belt has done in my family. My wife was a great sufferer from lame side and back, and was entirely cured by your Belt in a short time, and I cheerfully recommend it to all that may be suffering with a lame back or side. We tried many other remedies without getting any relief until we got your wonderful belt.

Yours truly,

G. P. POOLE,
Monson, Maine.

-1894-

Ossipee Valley Fair Colt Stakes

AND

2.40 STAKE RACE.

\$700 GUARANTEED.

THE OSSIPÉE VALLEY

Union Agricultural Association

Failure to name colt, or to make payment at dates specified, forfeits nominations and all moneys paid. Stakes divided 50, 25, 15 and 10 per cent.

Hay and straw will be furnished free to starters. One or more colts can enter and start from the same stable.

Address all communications and entries to

JAMES C. AYER, Secretary,

CORNISH, MAINE.

Bean's Perfection Feed Bag.

Pat. April 11, 1893 and Jan. 30 1894.

Made of canvas and galvanized iron. Two Bags, one inside the other, with space between them for eight quarts of oats, which drop through into the basin, gradually filling it about one inch, directly under the horses mouth. The basin is oblong in shape, with a screen in the forward end where the oats never come in contact. While the horse is eating, his nose is at the screen, through which he breathes as freely as though he had no bag on. Four quarts of oats slowly fed where the horse gets them all is of more value than six quarts gormandized and wasted on the street—This bag positively cures the habit of throwing the head—Don't lose sight of this fact.

One-tenth of the oats fed from the old bag and buckets are lost—Why not use our bag and save them.

Look along the street where the horses are fed by the old methods of feeding, is it either Justice or economy?

Use this Perfect and Humane Method, it will pay you to do so.

IT COSTS NOTHING IF NOT AS REPRESENTED.

Try one sample and be convinced. Every dealer who has ever sold Feed Bags should send for samples and prices.

ARLINGTON FEED BAG CO.,
15 CORNHILL, Room 2, BOSTON, MASS.

BANGOR, MAINE.

CHORALIST 14516

Sire CHIMES, the greatest sire of his age that ever lived, having at the age of nine years 15 in 2.30 list, 9 of them with race records below 2.20, including the world's champion 3 year old, FANTASY, 2.08 3-4.

First dam by Hamlin's Almont, Jr., the greatest sire of the Almont family; 2d dam a producing daughter of Strathmore; 3d dam by Albion; 4th dam has 5 in 2.30 list. The following great brood mares appear in Choralist's pedigree: Green Mountain Maid, with 9 in 2.30 list; Beautiful Bells, with 7; Minnehaha, with 7; Ned, with 5; Maggie Gains, with 3 producing sons.

CHORALIST is a mahogany bay, star, hind ankles white, stands 16 hands, and is well proportioned. Will make a short season in the stud, then trained for a fast record, which it is believed he is capable of taking.

Terms, to insure, \$50

ERIN 4372

Race record 2.24 3-4. Sired by BELMONT, dam Eventide dam of Kremlin 2.07 3-4, Evermond, 2.24 1-4, Erin, 2.24 3-4, etc., making Erin a brother to Nutwood, on his sire's side and to Kremlin on his dam's side.

Erin is a grand individual, standing 16 hands, dark bay, with black points. His breeding is surely great. TERMS, \$25 to insure.

ORRVILLE 3317

Race record 2.27 3-4, fifth heat, over Topsham half-mile track.

Sire Redwood, by Belmont, 1st dam by Daniel Lambert; 2d dam by Vermont Black Hawk; 3d dam, thoroughbred. Is bred for a race horse and has proved himself to be one. Some of his get are expected, this season, to prove that he is the sire of race horses. Bright bay, 15 1-2 hands, and as near perfection every way as is often seen. TERMS, \$20, to insure.

For tabulated pedigrees and particulars address,

LEONARD TILLINGHAST, SEC.

AND GEN. MANAGER.

Admitted to do Business in the State of Maine by Special Act of the Legislature.

J. R. SHEDD 2.19 1-4.

Sire's Family.

Sire, RED WILKES, 2.40:

Sire of 88 in the 2.30 list, including 20 in the 2.20 list;

Sire of 12 producing sons, including the sire of Florida, 2.18 1/4;

Sire of 9 producing dams, including dam of Evangeline, 2.11 1/4;

Red Wilkes, by George Wilkes.

GEORGE WILKES, 2.22.

Sire of 78 in the list. Sire of 74 producing sons including the sire of Martha Wilkes, 208, and Moquette, 2.10.

Sire of the dams of 50 in the list including Manager, 2.09 1/4, and Delmarch, 2.11 1/4.

Dam's Family.

Dam, BELLE ERICSSON:

By Ericsson, son of Mambrino Chief, 11;

Second Dam by VANDAL, son of Imp. Glencoe;

Third Dam by PILOT, Jr., Sire of dams of 36 in the list, including Jay-Eye-See, 2.06 1/4, Maud S., 2.08 1/4, Electricity, 2.17 1/4.

ERICSSON, 2.30 1-2:

Sire of 6 in the 2.30 list. Sire of the dams of Moquette, 2.10, Bellman, 2.17 1/4, and ten others in the list. A son of Ericsson sired the dam of Belle Vara, 2.08 1/4.

J. R. SHEDD is the sire of Woodshed four-year-old record, 2.13 1/4. Shedd's colts are noted for speed and beauty. In his turf career he showed himself to be a race horse of the best quality. He has a two-mile wagon record of 5.14, made at four years of age. His disposition is perfect, and a child can go around him with safety. Shedd was foaled in 1882, is a beautiful bay in color, stands 15-2 and is well built.

Service Fee, \$100, with usual Return Privilege.

COLD DUST, MORGAN STALLION GOLD DUST, MORGAN STALLION**"THE IDEAL ROAD HORSE."****"The handsomest, gamiest family of Roadsters, and as regards style, endurance and beauty they have certainly no equals."**

Sired by Indicator 1243, record at 19 years of age 2.23 1/2 (sire of Fred G. 2.30, Ottawa Maid, tria, as a two year old 2.30, Inverness, as a two year old 3.00), by Goldust 150 (sire of Lucille Goldust 2.16 1/2, Fleet Goldust, 2.20, Indicator, 2.23 1/2, Rolla Goldust, 2.25, etc.) by Vermont Morgan, out of a daughter of Arabian Zileadi.

1st dam, Linda Wilkes, by Lever B. 10703, by Red Wilkes 1749, out of Sally B. (dam of Toinette, 2.30, Fulcrum, trial 2.25, Lycurgus, 2.25, and the grandam of Early Bird, 2.15 1/2).

2d dam, Dolly, by Lexington Goldust 4205 (sire of Sir Roger, 2.23 1/2, grandsire of Black Diamond 2.19 1/2, and grand-dam of Florida 2.14 1/2), by Goldust, out of Eugenia, by Lexington.

3d dam, Capolin, by Jehu Morgan (sire of dam of Fleet Goldust, 2.20), by Black Hawk 142, out of a daughter of Gifford Morgan.

4th dam by Gano (sire of dam of Lady Thorn, 2.18 1/2, and sire of the dam of Mambrino Patchen, the broodmare sire of the world), by American Eclipse.

5th dam by Aratus, by Director, by Sir Archy.

6th dam by Blackburn's Whip by imported Whip.

7th dam by Kennedy's Diomed, by imported Diomed, out of an imported thoroughbred mare.

Many of the great performers are richly bred in Goldust lines as Johnston 2.06 1/2, Gold Ring, 2.12 1/2, Gossip Jr. 2.13 1/2, Indianapolis Boy, 2.13 1/2, John W. 2.13 1/2, Nelly W. 2.14 1/2, Rosalind Wilkes, 2.14 1/2, Clara D. 2.14 1/2, Sprague Goldust, 2.15 1/2, [nearly all to high wheels] and hundreds of others better than 2.30. To the Morgans, through other families, may be traced a great percentage of our best trotting and road horses.

It is not only in speed that the Goldust branch excels; with that essential element they combine great beauty and wondrous road powers, together with endurance derived from both Morgan and thoroughbred blood coming through Lexington, Boston, Glencoe, Vandal, Grey Eagle, Buzzard, Whip, Barefoot, Trustee, Gano, etc., in thoroughbred lines.

Golden Cross 14773 is a golden chestnut, 16 1/2 hands, and weighs over 1200 pounds; foaled in 1889

He has the beauty of the Goldusts, is strong, nervy, game and prompt in action, is perfectly gaited, of kind and gentle disposition and has every indication of extreme speed, and is now a grand road horse.

His first colts are coming yearlings. There is a growing interest in the Goldusts, as was seen at the Exposition in Chicago, where they received a large percentage of the awards. We shall be pleased to send a full description with pedigree and records to all who will favor us with their names, whether they propose breeding or not, and visitors are always welcome.

Fee, for the season of 1894, a few approved mares will be bred for \$35, with the usual return privilege. Goldust Stock for sale.

"BREED TO SPEED!"2.31 00000000000000000000 **MERRILL** 00000000000000000000 2.31

One of the fastest sons of Nelson 2.09, Chestnut stallion with Star 16 hands

high, weight 1100 lbs. foaled 1889. Sire Nelson 2.09 with 15 in the list in 1893.

First dam Tinsmith Maid by Watchmaker 2.31 1-4. Trial 2.22 1-2 sire, of Jeweller

2.28, Harmoun 2.28 3-4 Young Watchmaker 2.30. Second dam by Winthrop

Morrill by Young Morrill. MERRILL is a very strong made and handsome horse of

excellent disposition and has always been phenomenally fast. As a yearling he won

his race at Bangor getting a mark of 1.23 1-4, last quarter in 40 seconds. He got his

record of 2.31 at Mystic as a three year old last half in 1.14. At Rigby Park last

season he started in a field of old campaigners with a green driver. He was in

ninth position first heat and finished a close second. Was timed separately in this

heat in 2.15 3-4 and in second heat in 2.17. All heats in this race was below 2.20 and

MERRILL was the most dangerous competitor in the field. He will be with drawn

from the stud July 1st and it is confidently expected that he will get a mark of

2.15 or better before the close of the season. I have decided to place this grand

young horse within the reach of all. He will make the season of 1894 at \$35 by the

season \$50 to warrant, payable at time of first service, by cash or satisfactory note.

Mares taken to and from trains free of cost and boarded at low rates. For further

particulars address,

C. F. CLARK, Proprietor, - - - FALMOUTH HOUSE, BOSTON, MASS.

SIR CHARLES 6404.

RECORD 2.39 1-4.

Bred by Charles Backman, Stony Ford, N. Y.

Bay horse, off hind ankle white, stands 15 3-4 hands and weighs 1050 pounds. Foaled 1881.

SIR CHARLES is by Kentucky Prince, sire of Guy, 2.09 3/4, the great campaigner Spofford, 2.18 3/4, and 26 others in 2.30; also of the sire of Dexter Prince, who is having so great a success in California.

The dam of SIR CHARLES is Glenmary, full sister to America, dam of Bonnie (4) 2.25 and Benton, 2.27 3/4, and she is also sister in blood to Dexter, 2.17 1/4, Dictator, sire of Jay Eye See, 2.06 1/4, 2.10 trotting, Phallas, 2.13 3/4, etc., being Hambletonian 10 out of Fanny Star by American Star, Kentucky Prince by Clark Chief sire of Croxie 2.19 1/4, and several other noted performers; his dam Kentucky Queen by Morgan Eagle, son of Hale's Green Mountain Morgan.

SIR CHARLES is a handsome horse, a fast trotter, and a fine roadster. His colts much resemble him. He is bred much like Guy, 2.09 3/4, the great trotting gelding, and his colts much resemble him. No better bred stallion can be found in Maine to-day than SIR CHARLES. Terms, \$10, to warrant.

Dr. CHAS. R. WOOD,

Veterinary Editor American Horse Breeder,

Successor to THE LATE Dr. ROBT. WOOD,

SPECIALIST

In Surgery, Dentistry, Foot and Leg Lameness.

Twenty-five years' experience in the treatment of diseases of domestic animals. Refers to all well known horsemen in New England. Dr. Wood makes a specialty of the castration of stallions and redgelings. Also performs a special operation for spavins, which cures 90 per cent. of all cases.

ALSO PROPRIETOR OF

Wood's Famous Specific Remedy the Stable Requisite for Colic and Distemper in Horses.

The great number of valuable horses that die annually, suddenly, from that dreadful disease, colic, and the almost helplessness of their owners to check the rapid progress of the disease, has induced Dr. Wood to prepare a remedy, which, from his extensive practice he has found to be, in nearly every case treated, infallible, and at the same time which can be quickly and easily administered. This cure does not deteriorate with age. For a long period it has been used extensively by leading New England horsemen, and has been their main reliance on all occasions. Such prominent men as George G. Hall, George W. Bixby, James Golden, James R. Wood, Waldo Pierce, F. H. Foster, F. R. Sargent, Thomas McLaughlin, J. H. Richardson, Bob Stuart, James G. Farr, I. E. Currier, John S. Blanchard, J. H. Taylor, are loud in its praise. Dr. Wood has made it his study with great success, to so condense the active principles of this remedy that they are now consolidated into a very small compass, enabling it to be administered easily and act quickly, which is vital in checking the rapid strides of the disease. By the prompt administration of this remedy the disease will very seldom take the form of enteritis (inflammation of the bowels), which is so frequently the follower of colic. The lives of several valuable horses which have recently died might have been saved had this remedy been given them at the first appearance of the trouble. Chronic scouring also yields to this medicine. Chills, fever, and pneumonia, also garget in cows. Full directions accompany each bottle, containing four ounces. Price \$1 per bottle. Liberal discount to the trade. Sent by mail post-paid. Address C. R. WOOD, Veterinary Surgeon, P. O. Box 193, 300 Wilder St., Lowell, Mass.

2.07 3-4 THE BLOOD THAT WINS 2.08 1-4

THE SEER 2.19 $\frac{1}{2}$ MAINE'S GREAT RACE STALLION.

Record made second heat in a race, last quarter in 31 3-4 seconds, a 2.07 gait, over regulation track and hitched to high-wheel sulky.

THE SEER, 2.19 1-2, holds the fastest race record for Maine stallion at three, five and six years of age. He is sire of Lou Seer, winner of the yearling race at the New England Breeders Meeting of 1891, and holder of the New England race record for yearling of 1891-2. First full mile ever driven at speed. Also sire of Seersucker 2.30 and Slide which as a two year old was able to show a quarter in 36 seconds. The Seer is sure to sire speed and of the race horse order. Sire Gen. Benton with 22 in the list including Daly 2.15, Lord Byron 2.17, Sally Benton (4) 2.17 3-4, The Seer 2.19 1-2, the dam of Sunol 2.08 1-4 and Truman (4) 2.12 etc. Dam by Electioneer 148 in 2.30 or better including Arion (4) 2.07 3-4, Sunol 2.08 1-4, Palo Alto 2.08 3-4, etc. The Seer, blood bay stallion 15, 1 1-2 hand, weighs 1000 lbs. foaled 1885. \$50.00 to warrant. His season in the stud will be short and to but a limited number of mares.

SIDNUT Foaled May 19, 1890; sire Sidney, 2.19 $\frac{1}{2}$, forty-one in the list at 12 years of age, sire of Froufrou, yearling record, 2.25 $\frac{1}{2}$ (world's mark) and Fausta yearling, 2.22 $\frac{1}{2}$ (world's mark). Dam, Patti, by Nutwood, 2.18 $\frac{1}{2}$, greatest of living sires, sire of the dam of Arion, 2.07 $\frac{1}{2}$. Second dam, Centennial Belle, by Woodburn, thoroughbred, son of Lexington and sire of Monarch, 2.28 $\frac{1}{2}$ and Emma Robson, dam of Rowena (2), 2.17; Emaline, 2.29 $\frac{1}{2}$, and Emma R., 2.27 $\frac{1}{2}$. Third dam, Bonnie Belle, by Williamson's Belmont, sire of Stemwinder, dam of Directum, 2.05 $\frac{1}{2}$, thoroughbred son of American Boy. Fourth dam, Liz Givens, by Imp. Landford. Fifth dam, Charlotte Pace, by Sir Archy. Sixth dam by Imp. Resteess. Seventh dam, Green's Celer mare, by Celer. **\$50.00 TO WARRANT.**

MOLLIE, dam of
Cephas, 2.18 $\frac{3}{4}$.

THESEER'S first and only 5-year-old has a mark. Gen Benton and Electioneer are still breeding on, there now being 417 descendants in those two families in the list, including the get of their sons and daughters. Reglin's only 5 years old, has a mark. Mollie Matchless, in the great brood mare list, produced Cephas, 2.18 $\frac{3}{4}$, one of the best race horses ever raised in Maine, and was sired by Matchless, sire of Palma, 2.22 $\frac{1}{2}$. The fastest Maine bred campaigner out last year had for a dam a daughter of Matchless. The next fastest had for a grand-dam a daughter of Matchless. Redwood is the leading living sire of 2.20 speed in Maine. Every line of THE SERF's tabulation is a speed producing strain and concentrates in him a union of the fastest and gamest horse blood of our State.

THE SERF is a blood bay stallion; stands 16-1 and weighs 1100 lbs. Foaled April 19, 1889.

Terms \$25.00 to Warrant.

BOURBON KING

Sire Bourbon Wilkes, sire of Charleston 2.21 1-2, Abdallah 2.14 1-2, Tilford 2.17 3-4, and 34 in the 2.30 list. Bourbon Wilkes was by Geo. Wilkes 2.22, sire of Harry Wilkes 2.13 1-2, Guy Wilkes 2.15 1-4, Mike Wilkes 2.13 1-4, Wilson 2.16 1-4, and 82 with record lower than 2.30. Geo. Wilkes, whose sire was Hambletonian 10, sire of 40 daughters whose sons sired 955 trotters and 48 pacers, and whose daughters produced 73 trotters and one pacer.

The first dam of Bourbon King was Neoskoleta, trial 2.29. She was by Young America, sire of Hazor 2.26 1-4, and many other fast ones. The second dam is untraced; his third dam was by Abdallah Chief, sire of Abdallah Maid. She produced Mamie W. 2.27 1-2, Lady Mamie 2.29, Lady Independence 2.29 1-2. The fourth dam was by Blackwood.

BOURBON KING is a roan stallion, stands 16 hands high, four years old, and weighs 1100. He is evenly made, well finished, and a very intelligent horse. His head is best described by the word "sensible," a good size, yet not gross or dull. His feet are of the best and stand well under him. He has a fine, thin ear, which shows high breeding. His shoulders and chest are good length and depth, which denotes good lungs. His gait is elastic, sweeping and springy, and his whole bearing impressive.

If a man who breeds to Bourbon King misses a turf horse, he is sure of size and beauty that bring money for park and road. Referring to his pedigree above, we consider him one of the best bred stallions that stands in New England.

He will stand in Haverhill, Mass., to a limited number of mares, during the season of 1894. For full terms apply to

FRANK W. CHASE, HAVERHILL, MASS.

P. S.—Good stable board and pasture.

SIRE.	DAM.
JAY BIRD 2.31 1-4, sire of ALLERTON 2.09 1-4, JAY HAWKER (3) 2.14 3-4, EARLY BIRD 2.15 3-4, and 29 others with records below 2.30.	BUTTERCUP, race record 2.28, by BELMONT, sire of 49 in the 2.30 list, including NUTWOOD, 2.18 3-4, sire of 109 in the 2.30 list.

As an individual JAYBEL is unsurpassed. He is a rich mahogany bay, with left hind ankle white, stands 16 hands high, and weighs 1100 pounds. Disposition perfect.

JAYBEL's sire, Jaybird, has three producing sons, including Eagle Bird 2.21, sire of Monbars 2.11 3-4. He also has three producing daughters.

JAYBEL's dam, Buttercup 2.28, was a game race mare. She has a trial of 2.23, driven by James Golden, at Mystic Park. Her sire, Belmont, now has 36 producing daughters and 50 producing sons.

C. A. PARTRIDGE V. S., Farmington, Maine.

SCIENTIFIC HORSE FOOT LEVELLER.

DIRECTIONS.

Draw a string or wire around the hoof just below the hair; double the string and place the end in the center of the frog at heel; run it around to center of foot in front and make a mark. The center of the frog is the center of the foot behind. The mark in front is the center in front, provided you have measured right. Place the level No. 1. on the foot, with No. 2 in center of the frog. Screw the set-screw No. 3 into the mark on the center of the foot in front. If the foot is level it will show like cut "A." If not like "B." At the same time it gives you the angle of the foot with Nos. 4 and 5.

Price, \$3.00.

For Sale, Wholesale and Retail,

By HOOD & REYNOLDS, 178 Tremont Street, Boston, Mass.

P. S.—The long rod to which set screw No. 3 is connected also gives length of toe in inches.

THE TURF, FARM AND HOME is to-day in touch with more Horsemen in New England than all other Maine Publications combined. Make a note of it.

CASHIER 2.25 1-2

Black Roan Stallion 15 hands 2 1-2 inches high, foaled May 16, 1888

CASHIER was sired by Nelson 2.09 the greatest sire of speed that Maine has yet produced, having placed 15 in the 2.30 list the past season, and his dam is Bonnibel by Aral 2.247 Pacing record 2.25 1-2. Second dam Kittie a fast pacer by Young Tobin, by Rising Sun 429 (sire of Nabocklish 2.29 1-2) by Old Rising Sun, Aral the sire of CASHIER's dam was by Chenery's Gray Eagle 2061. Wagon record 2.31, sire of Ino 2.211 4, Red Bird 2.27 1-4, Wildeyes 2.32 1-2, Trial 2.20. Aral's dam was Katie by Hampton by Jupiter by Long Island Black Hawk. CASHIER is a strongly built horse weighs 1050 lbs, all smooth and sound, with the very best of feet and legs, he does nothing but pace and with the breeding back of him should not only take a low record but also sire speed. He started in five races last season, won three first money's two second's and drawn once. His record of 2.25 1-2 which he obtained last season at Maine State Fair in a winning race is no measure of his speed as he could easily have paced in 2.20 or better that day had he been driven to it. He will be taken from the stud July 1st and barring accidents will get a mark considerably below 2.20 before the season closes. CASHIER will serve a limited number of mares at \$35 to warrant to be paid, at time of service or satisfactory note.

DUAD 22,937

FOALED MAY 3, 1891.

DUAD is a son of Edgemark 7432, 2.16 by Victor Von Bismarck 326 by Hambleton 10. First dam Coral, a standard bred daughter of Nelson, 4209, 2.09 by Young Rolfe 3517, 2.21¹/₄. Second dam Belle Haven, daughter of Aral 2.247, P. 2.25¹/₂ by Chenery's Gray Eagle 2061, wagon record 2.31. Third dam Kate, daughter of Redwing 2.52 by Honest John 2.37¹/₂ by Gilbreth Knox 146, 2.26³/₄. Fourth dam Maggie May, daughter of Vermont Boy by Pride of Maine by Eaton Horse 122. Fifth dam Nelly, daughter of Gray Eagle by Hunton Horse by Bush Messenger by Winthrop Messenger. Sixth dam Lunt Mare (dam of Gray Bill 2.30) daughter of State of Maine by Stone Horse by Winthrop Messenger.

DUAD is handsome dark chestnut, and is a finely finished horse all over. He is not only a royally bred horse, his sire Edgemark having a 4 year old record of 2.16 and out of a standard bred daughter of Nelson 2.09, but he is individually as good as his breeding. He shows more speed at his age than any horse I have ever handled and is destined at no distant date to get a very low mark. Will serve a limited number of mares at \$35 to Warrant. Stabling and pasturage at reasonable rates. Every care will be taken but all stock at owner's risk. Address all communications to,

G. B. INGRAHAM, West Rockport, Maine.

NO BUSINESS DONE ON SUNDAYS.

Mares taken to and from boat or cars free of charge.

Jul 1st

NELSON WILKES

Chestnut horse, foaled 1890 stands 15 2 1-2, weight 1000 pounds. Sire Wilkes 8571, dam Stella Rolfe 2.35 by Nelson 2.09. Second dam by son of Witherell Messenger, third dam a Drew mare. Wilkes is the sire of such campaigners as Col. Osgood 2.18 3-4, St. Croix 2.21 1-4 and five others in 2.30 or better at 10 years of age. Four of his get went into the list as four year olds and reduced their records at five years of age. Col. Osgood, St. Croix and Fred Wilkes will trot in 2.15 or better and he will put several in the list in 1894. Wilkes was by Aleyone 2.27 which died at 10 years of age. Had he lived he would have proved himself the greatest of the sons of Geo. Wilkes. He has Martha Wilkes 2.08, race record 2.08 1-4, Harrietta 2.09 3-4, McKinney 2.11 1-4 and 36 others in 2.30 or better. Stella Rolfe got a race record of 2.35 and had she been properly handled would have been one of Nelson's fastest as she is one of his handsomest daughters. NELSON WILKES will be trotted after his stud season is over. He can show fast and is fine, strong and handsome at every point. Terms \$15. to warrant, at Guy Edward's stable Fairfield. For extended pedigree etc. apply to,

J. A. DAVISON, Owner, Waterville, Me.,

OR G. C. EDWARDS, FAIRFIELD, ME

BROADWAY

Race Record 2.29 1-2.

By Robert Smith son of Hambletonian 10; dam Volunteer Maid 2.27 by Volunteer 55, son of Hambletonian 10. Dam of Robert Smith by Eaton Horse 122.

BROADWAY is a bay stallion 15-3 and weighs 1150. He is inbred to the Hambletonian family which is the acknowledged source of speed. Inbreeding has produced some of our best and fastest performers an instance of which is Like-wise (4) 2.23¹/₄, the best race winning four year old which ever went from Maine and whose record had never been equalled prior to 1893 by a Maine bred four year old. Broadway when taken in hand was fat and had not been worked for speed. In his first race he took a record of 2.32¹/₄. The succeeding Saturday he trotted to a record of 2.30 winning both races and at Dover the next Tuesday on a poor half mile track made his record of 2.29¹/₂, making three races in one week. He is now in good condition and will be trotted this season when he should lower his record to 2.25 or better.

He is a trotter, a sire of speed and also of early speed. One of his colts has held the Maine yearling half mile record and there are others which will be entered in stakes and purses this season.

Hambletonian is the sire of 40 in the list and his daughters have produced 98 as given by Wallace. As pacers having a mark of 2.25 or better only are admitted it is probable that his producing daughters are cut down somewhat. Volunteer got St. Julian 2.11¹/₄ and 31 others and his daughters have produced 55 performers such as Brava 2.14¹/₂, Homestake 2.14¹/₄, Ripple 2.17¹/₂, and that great sire Sidney (an inbred Hambletonian) and sire of five yearlings in the list; three two year olds; Faustino 2.14¹/₂ and six other three year olds in 2.30 or better, and a total of 50 performers in the list, a showing far ahead of any other twelve year old sire; all of which shows the potency of the Hambletonian blood and inbreeding to that line.

Terms \$20 by the Season

with return privilege if mare does not prove in foal.

H. L. WILLIAM, Manager.

F. W. HILL, Proprietor, Exeter, Maine.

2.29 1-4 OWOISSA 2.29 1-4

OWOISSA is a son of a noted Campaigning Stallion Onawa 2.22¹/₄ who has 77 heats in 2.30 or better to his credit and a record of 2.18 with running mate, by Goodwins Hambletonian. OWOISSA's dam was Lady Camey undoubtedly by a daughter of Gen. Knox, she is the dam of Wedgewood Jr. 2.31¹/₄ with repeated trials of 2.25. She was a mare of indomitable courage and gameness and her colts all inherit that quality and can trot all day if necessary. OWOISSA stands 16 hands weighs 1075 lbs, color black. He is a horse of great style and finish and has a disposition that is perfect. Will serve a few mares at the extremely low price of \$15 by the season. For further particulars, address his manager

PRESERVE & RESTORE YOUR HORSES' FEET
BY USING
Strople's Horse Foot Liquid.

TRADE

MARK.

Strople's Horse Foot Liquid,

For growing and softening the hoof. Saves soaking and packing; keeps the feet in better condition with less time and labor than any other method. It is at the head of all horse foot remedies for contracted or sore feet. Sure cure for Thrush, Foot Rot, Quarter Cracks, Scratches, etc.

TO HORSE OWNERS AND DRIVERS.

Horses shod to correct all defects in gait, etc. Lameness a specialty. All diseases of the feet treated. Will go to any part of the state. No CURE, No PAY.

Give Strople's Horse Foot Liquid a Trial.

A trial of this liquid will convince any fair-minded person that it is the one thing above all others best qualified to take the place of nature, for the following reasons: It makes the foot soft but tough; it draws out all the fever and soreness; it promotes a rapid growth and gives it that dark, healthy appearance seen only in sound, healthy feet. In a short time after it is applied you can drive your horse through dust and it will not stick to the hoof, proving beyond a doubt that the Liquid has penetrated into the foot where it acts as an oil to grease and lubricate the joints, tendons, cords, etc., that center in the foot.

It PREVENTS as well as CURES all ailments of the feet. Use it and your horses' feet will always be in good condition.

Put up in Pint Cans—PRICE 50c.

ST. CROIX 10,2582.21 1-4 — **TROTting RACE RECORD** — 2.21 1-4

ST. CROIX'S book is now open for the season of 1894; limited to 25 approved mares, at the exceedingly low prices of \$35 by the season. Cash or satisfactory note at time of first service. Usual return privilege when in the stud or money returned at my option. Mares kept at reasonable rates. Season to close July 15th, when he will be put into training.

St. Croix stands 15 1-4 hands, weighs 1050 pounds, bay black points, perfectly sound and kind an excellent road horse and a very fast walker. He has always been sensationally fast. His three-year-old record of (2.54) was no measure of his speed. As a four-year-old he had had five week's training, started in five races, winning four of them getting a record of (2.28 1-4) and had speed enough to have won the other, but got second,—four of these races being against aged horses. As a five-year-old, he was only out of the stud three weeks, and started in a race at Fairfield, August 4th, against a field of seven horses—all good ones, making his first heat in 2.22 1-4, 2d in 2.24 1-4, 3d, in 2.21 1-4. He shares with Nelson (2.09) the honor of the fastest five-year-old record of Maine while Nelson made his record in a trial against time, on a mile track, St. Croix made his in the first heat of a contested race on a half-mile track. Good judges say he could have trotted that mile in 2.17 or 2.18, as he was jogged from the distance flag to the wire. As a two-year-old he got six living foals, four of them can show 2.40,—one of them, St. Croix, Jr., has a race record of 2.51 1-4. We look for him to go in the list this fall, and think the other three will not be far behind, if handled. The other two can show as well with the same handling. His younger foals are proving equally as well. St. Croix is by Wilkes, one of the greatest if not the greatest sons of Alcyone. Wilkes has Col. Osgood, 2.18 3-4; St. Croix, 2.21 1-4; Fred Wilkes, 2.24 1-2; Brownie, 2.24 3-4; Johnnie Wilkes, 2.27 1-2; Hazel, 2.28 1-4; Glimmer 2.30. St. Croix's dam is by Gideon, sire of the dams of Nelson, (2.09); Independence (2.21 1-4); Glenarm, (2.23 1-2); 2d dam by whalebone Knox; 3d dam, S. T. B., by Vermont Black Hawk.

For further particulars, address, WEBSTER WILLIAMS, NORTH ANSON, MAINE.

For Early and Extreme Speed, Breed to**11,689 HALEY 11,689****RACE RECORD AT 4 YEARS, 2.20 1-4.**

But this is by no means a limit of his speed. He won his races without being extended and besides being a trotter he is a great road horse. I don't think there is or ever was a horse that could go more miles in a day than his dam, Graynose, 2.31 1-4 and road qualities are what the most of our stallions lack. He was sired by a stallion king and his dam was by Fearnought, 2.23 1-4, a king in his day. He comes by his speed honestly, his ancestors being all trotters and producers of trotters. With the same chance he should outrank his sire, Nelson, 2.09, for early and extreme speed. Haley's dam, Graynose, 2.31 1-4, was out of Lady Balch and so was the dam of Young Rolfe, 2.21 1-4, the sire of Nelson, 2.09. He is a bay horse 16 hands high with the best of feet and legs, can trot without boots or weights and he always has his speed.

WILL STAND AT RIVERSIDE STOCK FARM,

One mile below depot.

South Gardiner, Me.**\$100 BY THE SEASON.**

Cash or satisfactory note at first service. Mares not proving with foal can be returned next season free. Brood mares 75 cents a week on grass, \$2.50 on hay and grain.

W. D. HALEY,**SOUTH GARDINER, ME.**

May 25 94.

A SON OF ONWARD 1411.

Claynos, 4382, dark bay, small star, bred by A. J. Alexander, Spring Station Ky. in 1885, weighs 1150, stands 16 hands, sound, stylish, gentle, speedy and as game as any horse.

Sire. Onward 2.25 1-4, son of Geo. Wilkes 2.22 and old Dolly (one of the **VERY GREATEST** of speed, producing dams dam of Director 2.17 (sire of Direct 2.05 1-2, Directum 2.05 1-4) Thorndale 2.22 1-4 (sire of Edwin Thorne 2.16 1-4), Onward 2.25 1-4 (sire of Rose Leyburn 2.15 1-4 and 82 others) Czarina 2.21 John F. Payne 2.45 1-2 at 3 yrs. (sire of Don Payne 2.18.) Winona (dam of Pretender, sire of 13 in the list) McCa (dam of Mavilla 2.27 1-4).

Onward at 18 yrs. of age surpasses any stallion living or dead as a source of speed. He has 83 in the list, one of them with a 2y old record of 2.20 1-4. Onward has 120 grand children in the list. More than 35 of his sons are sires, and their produce is even faster than that of Onward himself.

1st Dam of Claynos is Englewood, full sister of Wedgewood 2.19 (sire of 20 in the list) by Belmont, sire of 45 in the list.

2nd dam Woodbine, dam of Wedgewood 2.19, sire of 20 in 2.30; Woodford Mambrino 2.21 1-2, sire of 15 in 2.30; Monaco, sire of 10 in 2.30; Weisbaden, sire of 2 in 2.30; Silence, dam of 2 in 2.30.

3rd Dam Singleton mare. The breeding of Claynos ranks him as one of the very best bred stallions in Me. His oldest colts are but 2ys old and are as fine in every respect as any in New England. Wherever shown they have been prize winners. Two have been broken and driven some this season and could either of them show quarters in 45 sec. They are uniformly large, solid colors and beautifully gaited.

Claynos stands at East Corinth, Penobscott Co., Me.

Terms \$25. to insure.

A SON OF NELSON 2.09.

Glonoin, dark bay, small star, black points, 15-3 hand high, weighs 1050, clear and blood like as a thoroughbred, splendidly gaited, fast and a typical Nelson.

1st Dam, Trinket B. (by Blenn Morrill son of Winthrop Morrill,) a very fast, an one of the finest of road mares.

2nd Dam, Jennie Horn, by Messenger Hunter son of English Hunter.

or J. D. Cochrane, Saco, Me.

Contracted foot of horse with sup-posed Navicular Joint Disease, DEAD LAME.

EVERY FOOT that wears an iron shoe should also wear one of **RIPLEY'S EXTENSIBLE HOOF EXPANDERS**. They prevent and cure contraction, the cause of seven-eighths of the diseases of the horse's foot. Corns, the most common one, it is a needless cruelty to allow a moment when a cure is so easy. Do not wait until your horse is dead lame, his feet pain him long before he does any other mean things when you speed him, because the severe concussion hurts. Don't load him down with iron forward to increase and elevate his stride, it is only putting off the evil day; or blame the poor horse, he cannot go natural any more than you can when you have a tight shoe pinching a corn on your foot. Get the **"EXTENSIBLE"** same foot after five months use of Ripley's Extensible Hoof Expander. **HORSE GOING PERFECTLY SOUND.**

**AN EXPANDER THAT FITS ANY FOOT.**

Full directions in every box. Send by mail on receipt of price, of \$2.00. Address

J. G. RIPLEY, 183 Medford Street Boston Mass., Charlestown Dist.

Horseshoers and Veterinary Surgeons wanted as agents. Liberal Terms. Discount to the trade. Mention this paper.

JOHNNIE WILKES 2.27 1-2.**FOALED JUNE 18, 1888.**

is a beautiful dark mahogany bay, 15 1-2 hands high, weight 1050 lbs. Sire Wilkes, sire of Colonel Osgood 2.18 3-4. St. Croix 2.21 1-4, Fred Wilkes, 2.24 1-2 and four others in 2.30 list. Dam, Flossie by Locomotive by Gen Knox. Second dam Purity by Winthrop Morrill. Flossie his dam, is a very fast mare. Her first foal by Black Pilot sold to C. H. Nelson for \$600. Her second foal was **JOHNNIE WILKES**. His second dam, Purity has a record of 2.34 and has trotted halves in 1.13, quarters in 35 seconds. She was the dam of Oakland Girl 2.31 1-2, trial 2.20; is also full sister to Ben Morrill 2.27. **JOHNNIE WILKES** got his record last season at Bangor winning in straight heats in 2.27 1-2, 2.28 1-2, 2.28. Barring accidents he will trot in 2.20 or better the coming season. He will make the season at North Anson. Terms \$25 to warrant. For further particulars address,

W. F. French, North Anson, Me.**W. F. FRENCH, —(OWNERS)—P. LETRONEAU.****SACO VALLEY STUD.****CEBOLLA — 10510.****3 YEAR OLD RECORD 2.29 3-4. RACE RECORD 2.25 1-2.**

Son of Stranger, by Gen. Washington, out of Goldsmith Maid 2.14. First Dam Catawba by Jay Gould 2.21 1-2, by Hambletonian 10. Second dam, Western Girl by Bellfounder 63. Third dam, Fanny, by Wild Harry.

CEBOLLA was foaled in 1888 at the Fashion Stud Farm Kentucky, and is a solid bay, weighs 1050 lbs. and stands 16 hands high. He is pure gaited, has a kind disposition, and his record is no measure of his speed. He will be campaigned for a low record this season. He is the best bred stallion in the state at so low a fee.

Stranger his sire at 12 years old has 18 in 2.30 list, and 5 in the 2.20 list.

Service Fee Only \$35.**Limited to 30 Approved Mares.****COUDERT 23694.**

This Stallion is a full brother to Cebolla, 2.25 1-2. Sired by Stranger 3030. Dam Catawba by Jay Gould 2.21 1-2, bred in Kentucky by Fashion Stud Farm. Foaled in 1892, color bay. This is a very fast colt, large of his age, and of fine finish, and extra gaited, and will take a low record. We have placed his Service at \$25. Limited to 15 approved mares. Season for stallions closes June 1st.

Fashionably bred colts and fillies for sale at reasonable prices. For catalogue and information, address

THE IMPORTED THOROUGHBRED

CLEVELAND BAY STALLION,

SCAMPSTON ELECTRICITY

English Register No. 1893.

American Register No. 842.

Foaled May, 1889.

Imported 1890.

Height 15-3 hands.

Weights 1200 pounds.

Color, bright bay with black points.

Breeder, J. SCRATH, Grosmont, Yorkshire, Eng. Importer GEO. E. BROWN, Aurora, Ill.

To those desiring to breed mares to a good Cleveland Bay Stallion I offer the service of my horse, SCAMPSTON ELECTRICITY, with the fullest confidence. In size, color, symmetry of form, action, speed, endurance, intelligence and docility, he ranks with the very best of his race and shows his high lineage. He is a beautiful bay, perfectly sound and kind. He is 15-3 hands and weighs 1200 lbs.

SCAMPSTON ELECTRICITY will stand at the farm of his owner, on Western Avenue, two miles out of the city.

TERMS, TO WARRANT, \$25.00.

Due care will be exercised, but all accidents to mares at owner's risk. Mares taken to and from the cars free of charge. Address,

FRANK P. BECK, Augusta, Me.

For Pedigree, see circular which will be mailed upon application.

THE KENTUCKY STALLION SHIELD.

The Lightest, Cleanest, Best Fitting and an

Absolute Cure and Preventive of Self-Abuse.

PRICE \$5.00
WEIGHT ONLY 12 OZ

The best evidence of merit is in practical success. The Kentucky Stallion Shield has been on the market three years, and last year, 1893, though a dull year and horses declining, was by far our best year. It is the lightest, weighing but 12 oz., perfectly clean and no weight on horse's loins. It is easily kept clean and cannot become foul, the horse can extend his rod and urinate, but cannot abuse himself, and neither will it cause him to masturbate in his sheath, which, if once begun, cannot be stopped, as shields that do not allow the horse to draw its rod will certainly do. We will guarantee perfect satisfaction or money refunded. Give it a trial. It is the only shield that is perfect.

HEADQUARTERS FOR TURF GOODS

Our shield is the acknowledged leader, and our boots wherever tried have given the highest satisfaction. In point of excellent of stock, superior and careful workmanship in every detail and perfection of fit, they have no equal. The great PIXLEY 2.08 1/4, the greatest race mare of 1893, wore our boots in all her races; that fact alone is better than a page of testimonials; they were also worn by Anderson's NIGHTINGALE 2.10 1/4, and will be worn the season of 1894 by the great HARRIETTA 2.09 1/4. Call for our shield and horse boots and turf goods generally.

CHARLES W. COVELL, 213 Main Street,

SIGN—Big Gray Horse in Show Window.

LEWISTON, MAINE.

THE MOTTLED BAY STALLION

DYNAMO

WILL STAND AT THE

Fairhaven Farm, at Sheepscot Bridge.

Limited to a few first-class mares, from 950 to 1200 pounds.

TERMS, \$15, to warrant, but parties wishing to make the following arrangement, bringing mares having a record of 2.30 or less, there will be no charge until this horse or the foal trots to her established speed at the time of service; and then it shall be \$20 for 2.30 class, \$100 for 2.10, and all intermediate seconds reckoned according to this ratio.

DYNAMO, THE FIRST

Is one of the handsomest four-year-old colts, and finest make-ups; was sired by Young Watchmaker, record 2.30, he by Old Watchmaker 2.22 1-2, he by Winthrop Morrill, and he by Gen. Knox.

Highborn, the mother of this colt, is one of the finest and fleetest old mares in the country, but was never allowed on the track; is 22 years old, and is now just like a colt to handle. Three years ago this mare, hauling a 370-pound wagon, could not be headed by a 2.20 horse, so called, in a two-wheeled vehicle.

She was by Young McClellan, he by Gen. McClellan 2.26 1-2, and he by Old Drew, which was some of the best stock.

Second dam, a great roadster, and living upwards of thirty-five years, with sound feet and legs; was sired by the famous Call horse, the handsome English stallion, which trotted the first mile at the Maine State Fair in three minutes, something like forty years ago. He was by thoroughbred Cannon Ball, and from a Tam O'Shanter mare.

Third dam, pronounced the pest quadruped of the equine race on the old Rockland stage line.

Shall reserve the right to reject any that are not satisfactory. Good pasturing at the usual rate.

H. W. F. SARGEANT.

Weekly Auction!

30 HORSES!
